3.08 Application from Applicants with Degrees from Foreign Schools

2. Non-ABET or Foreign Degrees – Undergraduate degrees from universities that are not ABET accredited must be evaluated by the Board-approved evaluation service(s). If the evaluation finds that a degree is equivalent to an ABET BS degree in engineering, the applicant will be allowed to apply. If the evaluation finds that a degree is **not** equivalent to an ABET BS degree in engineering, the applicant will not be allowed to apply, but will be advised of the courses necessary to cure the deficiency. An applicant with an undergraduate non-ABET or foreign degree plus a graduate degree from a university in a curriculum which is ABET accredited at the undergraduate level will qualify for application; the undergraduate degree will not need to be evaluated.
