Approval to begin the Administrative Procedures Act process: to revise *The Mississippi Secondary and Postsecondary Curriculum Frameworks*

**EXECUTIVE SUMMARY**

The Mississippi Secondary and Postsecondary Curriculum Frameworks are revised on a four to five-year cycle. Each curriculum framework follows the established format for secondary or postsecondary vocational and technical programs.

Draft curricula for each program were revised and reviewed with input from local district personnel and business/industry collaborators. Approved secondary and postsecondary curricula will be disseminated for implementation in the 2008-2009 school years. Postsecondary curricula must be implemented by July 1, 2009.

The following secondary and postsecondary curriculum frameworks are recommended for approval:

**Secondary Programs**

- Family and Consumer Sciences and Related Technology

**Postsecondary Programs**

- Automotive Vehicles and Accessories Marketing Operations
- Business and Marketing Management and Related Technology
- Food Production and Management Technology
- Irrigation Management Technology
- Massage Therapy
- Pharmacy Technology
- Pipefitter/Steamfitter
- Plumbing Technology
- Practical Nursing
- Process Operations Technology
- Sheet Metal Technology

The *Executive Summary-Secondary Curricula Frameworks* contains the following elements for each revised secondary curricula:

- Program Description
- CIP Code and CIP Name
- Course Outline
The Executive Summary-Postsecondary Curricula Frameworks contains the following elements for each revised postsecondary curricula:

- Program Description
- Suggested Course Sequence
- Listing of Courses
  - Course Name
  - Course Abbreviation
  - Classification
  - Description (including recommended number of lecture and lab contact hours)
  - Pre/Corequisites

All curricula frameworks are designed to provide local programs with a foundation that can be used to develop localized instructional management plans and course syllabi. Contents of each framework are not designed to limit the content of a course, but to provide a minimum baseline of instruction, which all programs must meet. Teachers, administrators, and instructional management personnel are encouraged to expand and enhance the statewide frameworks to better meet the needs of their students.

Backup Material attached.

Recommendation:   Approval

NOTE: The Office of Vocational Education and Workforce Development have provided printed, bound executive summaries for the curriculum frameworks. The completed documents are available upon request.

The Mississippi Department of Education, Office of Vocational Education and Workforce Development does not discriminate on the basis of race, color, religion, national origin, sex, age, or disability in the provision of educational programs and services or employment opportunities and benefits. The following office has been designated to handle inquiries and complaints regarding the non-discrimination policies of the Mississippi Department of Education: Director, Office of Human Resources, Mississippi Department of Education, 359 North West Street, Suite 359, Jackson, Mississippi 39201, (601) 359-3511.
Foreword

Secondary vocational-technical education programs in Mississippi are faced with many challenges resulting from sweeping educational reforms at the national and state levels. Schools and teachers are increasingly being held accountable for providing true learning activities to every student in the classroom. This accountability is measured through increased requirements for mastery and attainment of competency as documented through both formative and summative assessments.

The courses in this document reflect the statutory requirements as found in Section 37-3-49, Mississippi Code of 1972, as amended (Section 37-3-46). In addition, this curriculum reflects guidelines imposed by federal and state mandates (Laws, 1988, ch. 487, §14; Laws, 1991, ch. 423, §1; Laws, 1992, ch. 519, §4 eff. from and after July 1, 1992; Carl D. Perkins Vocational Education Act III, 1998; and No Child Left Behind Act of 2001).

Each secondary vocational-technical course consists of a series of instructional units which focus on a common theme. All units have been written using a common format which includes the following components:

- **Unit Number and Title**
- **Suggested Time on Task** - An estimated number of clock hours of instruction that should be required to teach the competencies and objectives of the unit. A minimum of 140 hours of instruction is required for each Carnegie unit credit. The curriculum framework should account for approximately 75-80 percent of the time in the course.
- **Competencies and Suggested Objectives**
  - A competency represents a general concept or performance that students are expected to master as a requirement for satisfactorily completing a unit. Students will be expected to receive instruction on all competencies.
  - The suggested objectives represent the enabling and supporting knowledge and performances that will indicate mastery of the competency at the course level.
- **Suggested Teaching Strategies** - This section of each unit indicates strategies that can be used to enable students to master each competency. Emphasis has been placed on strategies which reflect active learning methodologies. Teachers should feel free to modify or enhance these suggestions based on needs of their students and resources available in order to provide optimum learning experiences for their students.
- **Suggested Assessment Strategies** - This section indicates strategies that can be used to measure student mastery. Examples of suggested strategies could include rubrics, class participation, reflection, and journaling. Again, teachers should feel free to modify or enhance these suggested assessment strategies based on local needs and resources.
Executive Summary

- **Integrated Academic Topics, Workplace Skills, Technology Standards, and Occupational Standards** - This section identifies related academic topics as required in the Subject Area Assessment Program (SATP) in Algebra I, Biology I, English II, and U. S. History from 1877, which are integrated into the content of the unit. It also identifies the 21st Century Skills, which were developed by the Partnership for 21st Century Skills, a group of business and education organizations concerned about the gap between the knowledge and skills learned in school and those needed in communities and the workplace. A portion of the 21st Century Skills addresses learning skills needed in the 21st century, including information and communication skills, thinking and problem-solving skills, and interpersonal and self-directional skills. The need for these types of skills have been recognized for some time and the 21st Century Skills are adapted in part from the 1991 report from the U.S. Secretary of Labor’s Commission on Achieving Necessary Skills (SCANS). Another important aspect of learning and working in the 21st century involves technology skills, and the International Society for Technology in Education, developers of the National Education Technology Standards (NETS), were strategic partners in the Partnership for 21st Century Skills.

- **References** - A list of suggested references is provided for each unit. The list includes some of the primary instructional resources that may be used to teach the competencies and suggested objectives. Again, these resources are suggested and the list may be modified or enhanced based on needs and abilities of students and on available resources.
# Table of Contents

- Foreword ............................................................................................................................. 3
- Family and Consumer Science and Related Technology ................................................... 6
  - Family and Consumer Sciences ...................................................................................... 6
- Appendix A: Academic Standards .................................................................................... 28
- Appendix B: 21st Century Skills ..................................................................................... 36
Family and Consumer Sciences (FCS) education in Mississippi consists of the CORE program and specific occupational programs. The CORE program prepares students for living in the real world and helps them develop leadership, problem-solving, decision-making, critical thinking, communication, computer, and mathematical skills. The specific occupational programs focus on career exploration and gaining the skills in a specific profession for entry level employment or continuation of education. FCS education enhances the leadership potential and essential life skills of its students and encourages life-long learning.

Family and Consumer Sciences education offers pathways in the following areas:

- **CORE Program**
  - Family Dynamics
  - Family and Individual Health
  - Child Development
  - Nutrition and Wellness
  - Personal Development
  - Resource Management

- **Occupational Pathways**
  - Culinary Arts
  - Early Childhood
  - Hospitality

Skill standards referenced are from the *American Association of Family and Consumer Sciences, VTECS, and the National Health Education Standards.*
Course Outline

Family Dynamics
Course CIP Code: 20.0121

Course Description: Family Dynamics is a course which develops skills related to personal, family, and social issues. It includes instruction in dimensions of adolescent development, family decisions and responsibilities, social decisions and responsibilities, and management of family systems in today’s society. (Grade 9-10-11-12, 1 Semester, .5 Carnegie Unit)

Executive Summary

**Course Name:** Family Dynamics I  
**Course CIP Code:** 20.0121

1. Understand growth and change during the teen years.  
   a. Describe growth and change in the muscular, skeletal, and endocrine system which occurs at puberty.  
   b. Describe the needs which must be met for healthy emotional development.  
   c. Explain the role of genetics and environment in shaping the personality and compare personality types.  
   d. Describe ways of relating to and communicating effectively with others.

2. Explain the importance of developing a positive self-esteem.  
   a. Describe how self-esteem influences and enhances behavior.  
   b. List ways to improve self-esteem.

3. Examine one’s own potential for career development.  
   a. Recognize one’s own personality traits as related to career interest and development.  
   b. Design goals and strategies for reaching one’s potential.

4. Determine choices involved in establishing a lifestyle.  
   a. Analyze the impact of physical and social decisions on lifestyles to include dating behaviors.

5. Develop an understanding of the role of dating.  
   a. Identify the purposes of dating.  
   b. Explore patterns in a dating relationship.  
   c. Discuss challenges associated with dating.  
   d. Practice interpersonal skills related to dating.  
   e. Explore the advantages of delayed dating and living single.

6. Develop an understanding of love and commitment.  
   a. Explore the concept of love.  
   b. Discuss misconceptions regarding love and marriage.  
   c. Identify factors to consider in selecting a marriage partner.  
   d. Identify factors that contribute to a successful marriage.  
   e. Practice decision-making skills needed in a marital relationship related to topics such as budget, recreation, housing, other friends, children, etc.

7. Evaluate steps to building a marriage.  
   a. Explain how the choice of a marriage partner affects one’s life.  
   b. Identify issues which should be discussed before marriage.  
   c. Determine factors which contribute to a successful marriage.

8. Recognize the demands of responsible parenting.  
   a. Analyze factors indicating readiness for parenting to include physical, social, emotional, financial, and legal responsibilities.  
   b. Assess the impact of pregnancy on life goals.

9. Evaluate the dynamics involved in preserving the family as a unit.  
   a. Describe the family system.  
   b. Explain the functions of a family to include nurturing, economic, social, and intellectual support.  
   c. Analyze factors that make strong families including commitment, communication, and decision-making.
Executive Summary

d. Relate the use of conflict resolution in the prevention of family violence.
e. Describe a family support system and its value.
10. Develop coping techniques for individuals dealing with crisis in the family.
   a. Define the types of crisis that families face.
   b. Locate resources that assist individuals and families in crisis situations.
   c. Identify appropriate solutions for individuals in family crises.
11. Explore the aspects of domestic violence.
    a. Identify types of domestic violence.
    b. Discuss warning signs of violence.
    c. Identify preventive measures and intervention skills.
    d. Practice intervention skills.
12. Utilize resources and technology in managing multiple roles of family members.
    a. Evaluate resources available to families which enhance the overall quality of family life.
    b. Assess the use of technology in the management of multiple roles of different family members.
13. Analyze factors of balancing work and family.
    a. Describe two kinds of work that families do.
    b. Explain how attitudes about who does the work in a family have changed over the years.
    c. Summarize ways in which jobs affect family life and vice versa.
14. Discuss career options working with human service occupations.
    a. Identify and/or research related human services job opportunities.
Family and Individual Health
Course CIP Code: 20.9126

Course Description: Family and Individual Health is a course which develops skills related to personal, social, and mental health in today’s society. It includes instruction on human growth and development, disease prevention and control, substance abuse and prevention, community and environmental health, and safety and first aid. This course can be taken in lieu of Comprehensive Health. (Grades 9-10-11-12; 1 Semester, .5 Carnegie Unit)

Executive Summary

Course Name: Family and Individual Health
Course CIP Code: 20.9126

1. Describe ways to achieve and maintain a healthy lifestyle.
   a. Define health and list characteristics of a healthy person.
   b. State good personal hygiene habits to include dental, skin, hair, ear, eye, and nail care.

2. Explain the relationship between current health decisions and future wellness.
   a. Identify the steps in the decision-making model.
   b. Apply the decision-making model to solve a personal problem.

3. Recognize the benefits of being a wise consumer.
   a. Identify rights and responsibilities as a consumer.
   b. Identify popular types of deceptive advertising and product fraud.
   c. Recognize medical quackery in the marketplace.
   d. Examine ways for paying for health care services.

4. Explain how mental health contributes to personality.
   a. Explain how an individual’s mental and physical health habits affect what he/she thinks about himself/herself.
   b. Identify non-threatening ways of being assertive.

5. Describe how stress influences mental health.
   a. Identify situations that cause stress and explain the body’s response.
   b. Develop a stress management plan.

6. Define functional and organic mental disorders and state controls for each.
   a. Identify signs of mental health problems.
   b. Identify ways to treat mental disorders.
   c. Identify warning signs of suicide and demonstrate intervention strategies.
   d. Discuss eating disorders such as anorexia, nervosa, and bulimia.

7. Describe how the skills of communication and cooperation are essential for healthy relationships.
   a. Identify strategies for choosing abstinence when faced with sexual pressures.
   b. Identify qualities that are important in close friends.

8. Describe why the family is the basic social unit of society.
   a. Describe elements that healthy families have in common and ways to maintain family health.
   b. Explain factors that may cause a family system to break down to include spousal and child abuse.

9. Summarize how genetic traits are passed on from one generation to another.
   a. Define the role heredity plays in determining physical traits and distinguish between dominant and recessive genes.
   b. Identify various genetic and environmental birth defects.

10. Examine health practices to be considered before, during, and after pregnancy.
   a. List reasons that parents decide to have children.
   b. Discuss various methods of family planning.
   c. Discuss prenatal development.
   d. Describe the birth process.
   e. Identify adjustments for parents and newborns during postpartum period.
11. Identify physical, mental, and emotional changes which occur from childhood throughout adolescence.
   a. Trace developmental stages of infancy, childhood, and adolescence.
   b. Name the physical, mental, and emotional changes that happen during adolescence, and state how these changes affect identity and interpersonal relationships.

12. Examine the aging process from adulthood through death.
   a. Discuss the tasks and opportunities of young, middle, and older adulthood.
   b. Identify ways to cope with death and dying.

13. Recognize the causes, transfer, and control of common communicable diseases.
   a. Discuss the causes of infectious diseases, the ways in which diseases are spread, and how the body defends itself.
   b. Identify the stages of an infectious disease and the factors involved in its treatment.
   c. Describe the symptoms and treatment of some common infectious diseases such as chicken pox, mumps, common cold, hepatitis, etc.

14. Recognize the ways to prevent HIV infection and STDs.
   a. Describe the symptoms, mode of transmission, and control of sexually transmitted diseases to include HIV infection and AIDS.
   b. Identify behaviors that put a person at risk for contracting HIV.

15. State causes, signs, and control of noninfectious diseases.
   a. Name the different kinds of cardiovascular diseases and their risk factors.
   b. Describe the warning signs of cancer and the ways to reduce personal risk including breast and/or testicular cancer.
   c. Explain the types and treatments for diabetes, arthritis, and other chronic diseases including those requiring long-term care.

16. Make responsible food choices.
   a. Explain the organization of the Food Guide Pyramid.
   b. Identify six classes of nutrients and describe their function in the human body.
   c. Trace the path of food through the digestive system.
   d. Identify kinds of information provided on a food label.
   e. Create a daily meal plan for his/her own family and calculate the number of calories.

17. Discover the importance of fitness.
   a. Explain the physical and psychological benefits of exercise.
   b. Develop a regular plan of exercise.

18. Analyze the health hazards of tobacco.
   a. List major reasons why people either abstain from or use tobacco.
   b. Describe long-term effects of tobacco use and the dangers of passive smoking.

19. Analyze the health hazards of alcohol.
   a. Identify the short- and long-term effects of alcohol on the body.
   b. Explain the impact of alcohol on alcoholics, their families, and society.

20. Analyze the health hazards of drugs.
   a. Differentiate between legal and illegal drugs and explain the benefits and harmful effects of these drugs.
   b. Describe how drugs work, what their side effects are, and how they are commonly abused.
21. Analyze the health hazards of inhalants.
   a. Discuss various types of inhalants.
   b. Identify dangers associated with use of inhalants.
22. Discuss refusal and intervention skills.
   a. Develop refusal skills for all forms of drugs and inhalants.
   b. Demonstrate ways to intervene and help a drug dependent friend.
23. Identify community health care agencies and their functions.
   a. Describe organizations and services that assist community and individuals in
      health promotion.
   b. List career opportunities in health.
24. Explain how environment affects people and how people affect the environment.
   a. Determine how pollution, natural disasters, overpopulation, and community
      violence affect our environmental health.
   b. Name sources of air, water, noise, radiation, and ground pollution.
   c. Describe government agencies that protect the environment.
25. Discuss promotion of safety and prevention of accidents.
   a. Describe behaviors which promote home safety.
   b. Describe ways to prepare for disasters in the community.
   c. Identify basic safety rules that help prevent accidents at work and play.
   d. Explain ways to promote vehicle safety to include regular use of seat belts for all
      ages.
   e. Recognize violent situations and how to avoid them including rape, assault, gang
      related activities, etc.
26. Discuss and demonstrate procedures for emergency situations.
   a. Identify and assess emergency situations.
   b. Describe how to respond to common emergencies.
   c. Assemble contents of a basic first aid kit.
   d. Practice first aid emergency procedures to include reporting accidents and
      providing first aid for wounds, choking, fractures, heart attacks, seizures, and
      poisonings.
**Child Development**  
Course CIP Code: 20.0122

**Course Description:** Child Development is a course which develops skills related to physical, social, intellectual, and emotional development of the child. It includes instruction on considerations for parenthood, prenatal care, child growth and development, behavior management, needs of exceptional children, and career opportunities. (Grades 9-10-11-12; 1 Semester, .5 Carnegie Unit)

Executive Summary

**Course Name:** Child Development

**Course CIP Code:** 20.0122

1. Discuss considerations before parenting.
   a. Determine the importance of abstinence.
   b. List options for parenthood.
2. Analyze the importance of good parenting.
   a. Determine reasons to plan before parenthood.
   b. Describe the importance of responsible parenthood.
3. Examine responsibilities of good prenatal care.
   a. Identify the physical changes which occur during pregnancy.
   b. Analyze the importance of good prenatal care for the mother and unborn child.
   c. Discuss the costs associated with prenatal care.
4. Discuss the physical, emotional, social, and intellectual needs of the infant, from birth to one year.
   a. Demonstrate basic care of physical needs of infants.
   b. Explore interaction of social and emotional development of an infant.
   c. Describe an intellectually stimulating environment which includes language and sensorimotor development.
5. Discuss meeting physical, emotional, social, and intellectual needs of children from one to three years of age.
   a. Explain how parents and care givers can influence physical development to include nutrition, play experiences, and self-help skills.
   b. Explore the ways social and emotional needs interact in development.
   c. Explain how parents and care givers can influence stages of intellectual development through methods of learning to include incidental learning, trial and error, and imitation.
6. Analyze strategies for managing behavior.
   a. Define and differentiate guidance terms and strategies for managing behavior.
   b. Illustrate appropriate methods for guiding children’s behavior.
7. Demonstrate effective ways of dealing with misbehavior.
   a. Discuss reasons for misbehavior in children.
   b. Demonstrate how to handle common child misbehavior such as temper tantrums, separation anxiety, sibling conflicts, aggression, etc.
8. Determine ways to meet the needs of an exceptional child.
   a. Describe the needs of children with physical, mental, and emotional disabilities.
   b. Explain how parents and other care givers can assist and encourage disabled children.
   a. Identify types of child abuse and neglect.
   b. Summarize factors which may cause and prevent child abuse.
   c. Discuss child abuse intervention procedures.
10. Analyze methods of dealing with crises affecting parent-child relationships such as divorce, moving, death, and family crises.
    a. Construct guidelines for helping children cope with divorce.
    b. Construct guidelines for helping children cope with moving.
Executive Summary

d. Construct guidelines for helping children cope with family crises to include illness, loss of job, debts, substance abuse, etc.

11. Discuss professional organization credentialing and state licensure.
   a. Identify professional organizations in the child care industry.
   b. Discuss credentials required for positions in the child care industry.
   c. Identify licensure requirements for Mississippi.

12. Explore career and job opportunities in the field of child development.
   a. Identify competencies needed by caregiver personnel to include positive work habits and attitudes, good management skills, good communication skills, leadership skills, ethical behavior, and emotional maturity.
   b. Describe how student leadership activities relate to careers.
Nutrition and Wellness
Course CIP Code: 20.0130

Course Description: Nutrition and Wellness is a course which develops skills related to proper nutrition and the concept of overall wellness. It includes instruction in nutrition, exercise and diet, healthy food choices, meal preparation, and components for a healthy lifestyle. (Grades 9-10-11-12, 1 Semester, .5 Carnegie Unit)

1. Explain the connection between nutrition and wellness.
   a. Define nutrition and wellness.
   b. Discover how healthy food choices influences wellness.
2. Describe the classes and types of nutrients.
   a. Identify the six major classes of nutrients.
   b. Distinguish between organic and inorganic nutrients.
   c. Identify food sources for each class of nutrients.
   d. Distinguish between fat soluble and water soluble vitamins.
   e. Describe the proper use of nonfood sources of nutrients.
   f. Distinguish between saturated and unsaturated fatty acids.
3. Describe the various functions of the six classes of nutrients.
   a. Identify the functions of carbohydrates in the body.
   b. Identify the functions of fats in the body.
   c. Identify the functions of proteins in the body.
   d. Identify the functions of water in the body.
   e. Identify the functions of vitamins in the body.
   f. Identify the functions of minerals in the body.
4. Explain the processes of digestion, absorption, and metabolism.
   a. Identify the organs involved in digestion.
   b. Describe the stages of digestion.
   c. Explain the process of absorption.
5. Understand the role of energy in well-being and performance.
   a. Determine energy needs to maintain optimal health.
   b. Explain factors that increase or decrease energy usage by the body.
6. Describe the effects of body weight on overall wellness.
   a. Define terms related to body weight including ideal body weight, overweight, obesity, and underweight.
   b. Analyze factors that affect body weight, including physical, emotional, psychological, and hereditary factors.
   c. Research the risks associated with weight problems.
7. Evaluate methods of weight control.
   a. Discuss the role of diet and physical activity as keys to weight control.
   b. Determine whether a weight loss or weight gain program is nutritionally sound and effective.
   c. Discuss the effectiveness of various medications in weight control.
8. Understand malnutrition and its effect on wellness.
   a. Explain the consequences of malnutrition at different stages of growth and development.
   b. Define the common types of eating disorders.
   c. Discuss nutritional problems common to the adolescents.
9. Describe the concept of personal fitness.
   a. Explain terms related to personal fitness including health, wellness, functional health, physically active lifestyle, and sedentary lifestyle.
   b. Explain the difference between exercise and physical fitness.
Executive Summary

c. Discuss attitudes and beliefs about physical fitness including lack of time, poor physical condition, high percentage of body fat, unrealistic physical fitness goals or expectations, lack of knowledge about physical fitness, and negative experiences with physical activity.

10. List health risk factors and their effect on personal fitness.
   a. Identify health risk factors including age, heredity, gender, smoking, hypertension, high blood cholesterol, diabetes, hypokinetic lifestyle, stress, and obesity.
   b. Evaluate the risk factors associated with various lifestyle diseases such as cardiovascular disease, hypertension, cancer, and diabetes.
   c. Discuss problems associated with smoking including cardiovascular disease, lung cancer, throat and mouth cancer, birth defects, hypertension, chronic bronchitis, shorter lifespan, and premature wrinkling of the skin.

11. Understand the role of exercise in maintaining a life-long program of physical fitness.
   a. Explain how obtaining or maintaining physical fitness can benefit each of the following: physical appearance, self-esteem, stress, academic performance, life expectancy, and health care costs.
   b. Discuss the suitability of various safe physical activities for different stages of the life cycle.
   c. List reasons for having a medical examination before beginning a personal fitness program.
   d. Evaluate current level of physical activity as related to overall health and well being.
   e. Demonstrate the use of selected physical exercise equipment.

12. Discuss the concepts of body composition in relation to personal fitness.
   a. Identify the concepts of body type and body composition.
   b. Compare the relationship between body composition and the risk of developing chronic diseases in adults.
   c. Describe the use of body composition evaluations including height/weight chart, body circumference, skinfold, and medical/laboratory methods.

13. Plan menus for individual and groups.
   a. Explain the Food Pyramid.
   b. Analyze existing menus for nutrition and acceptability.
   c. Identify the factors to consider when planning menus for individuals and groups.
   d. Develop menus for individuals and groups considering various factors.
   e. Demonstrate appropriate portion size of each food pyramid group.

   a. Identify the steps to follow when purchasing food.
   b. Compare costs, services, and other factors among different types of food stores, including grocery stores, convenience stores, food co-ops, warehouses, specialty stores, government distribution agencies.
   c. Critique food labels for nutritional content.
   d. Apply basic math skills to compute cost of food per serving.
   e. Compare the costs and acceptability of commercially prepared foods versus home prepared foods.
   f. Discuss the government agencies responsible for assuring safety of the food supply.
15. Identify food preparation tools and equipment and their use.
   a. Describe food preparation tools and equipment.
   b. Demonstrate the use of food preparation tools and equipment.
16. Demonstrate the proper procedures for measuring ingredients.
   a. Apply proper procedures for measuring ingredients.
   b. Apply basic math skills in calculating conversions of measurements to equivalents.
17. Evaluate procedures that preserve nutritional quality and safety during food preparation.
   a. Identify major bacteria, viruses, and molds that cause food-borne illnesses.
   b. Describe how bacteria, viruses, and molds make food unsafe.
   c. Discuss steps to follow in handling and storing foods to protect nutritional quality and food safety.
18. Prepare and critique food products.
   a. Interpret recipe terminology and the importance of preparation.
   b. Prepare and/or critique food products using regular and low fat recipes.
   c. Prepare and/or critique food products using two or more cooking methods.
   d. Prepare and/or critique food products comparing convenience versus scratch methods.
19. Demonstrate proper social etiquette to include multicultural situations.
   a. Discuss table service to include formal and informal service.
   b. Demonstrate basic table setting techniques.
   c. Demonstrate proper table manners.
20. Review occupational and leadership opportunities in foods and nutrition.
   a. Investigate career opportunities in the nutrition and wellness areas.
   b. Describe leadership opportunities available from student youth organizations in the school and community.
Executive Summary

**Personal Development**  
Course CIP Code: 20.0120

**Course Description:** Personal Development is a course which develops skills related to positive interpersonal relationships within the family, peer groups, the work place, and the community. It includes instruction on self discovery, personal decisions, relationships with others, establishing goals, career survival skills, and clothing and nutritional sound choices. (Grades 9-10-11-12, 1 Semester, .5 Carnegie Unit)

Executive Summary

Course Name: Personal Development
Course CIP Code: 20.0120

1. Explore personality development in relation to one’s self and others.
   a. Identify forces that shape personality development including personality traits, heredity, and environment.
   b. Explain how self-concept influences a person’s relationship with others.
   c. Explain how self-esteem influences and enhances behavior.
   d. Demonstrate ways to improve self-esteem.

2. Identify personal traits that build character.
   a. Describe positive character traits such as honesty, self-discipline, responsibility, compassion, motivation, perseverance, etc.
   b. Explain how a person’s character is revealed by his/her behavior.
   c. Identify a list of responsibilities that help teens to become responsible adults.
   d. Evaluate personal traits.

3. Expressing personal clothing styles.
   a. Explore influences on clothing choices.
   b. Understand appropriate dress for specific roles and occasions.
   c. Discuss factors to consider when evaluating your wardrobe.
   d. Define and list accessories.

4. Describe elements and principles of design.
   a. Understanding color terminology.
   b. Select flattering clothing by applying the elements and principles of design.
   c. Give guidelines for shopping responsibly.

5. Explain the importance of proper clothing care.
   a. Interpret a fabric care label.
   b. Determine care methods for clothing.
   c. List options for recycling unwanted clothes and expanding your wardrobe.

6. Apply the principles of design to a room.
   a. Design a living space.
   b. Review home furnishing styles and time periods.
   c. Furnish a living space to include storage options.

7. Identify the 3 parts of wellness: physical, social, and emotional.
   a. Describe physical, emotional, and social needs of foods.
   b. List personal and social influences on food choices.
   c. Identify eating disorders and effects on personal food choices.
   d. List positive weight management options.

8. Discuss ways to promote physical and emotional health.
   a. Define the importance of physical activity.

9. Improve relationships with family members.
   a. Identify ways to improve family relationships.
   b. Practice techniques to enhance parent/child and sibling relationships.

10. Improve relationships with others.
    a. Describe the qualities of friendship.
    b. Identify ways to maintain and improve friendships.
    c. Evaluate techniques for effectively dealing with peer pressure.
d. Explore opportunities to build relationships in a culturally diverse society.

11. Develop skills that enhance relationships.
   a. Demonstrate communications skills that help to improve relationships.
   b. Explore negotiation and mediation skills.
   c. Identify leadership and citizenship skills.
   d. Describe how proper etiquette and social skills improve self-esteem and relationships with others.

12. Recognize the importance of setting and attaining goals.
   a. Define short-range and long-range goals.
   b. Create strategies for reaching goals.
   c. List the steps in the decision-making process.
   d. Describe the role of decision-making in setting and attaining goals.

13. Develop career survival skills.
   a. Demonstrate job interview skills.
   b. Review personal traits that assist individuals in coping with career and workplace change.
   c. List the causes of stress in the workplace.
   d. Recognize symptoms of stress.
   e. Identify ways to cope with stress.
   f. Define interpersonal skills necessary for maintaining positive relationships in the workplace.

   a. Define and apply professionalism to different situations.
   b. Demonstrate appropriate dress attire for different situations.
   c. Analyze workplace attitudes for different situations.
   d. Discuss the importance of punctuality.

15. Discuss social etiquette of technology usage.
   a. Identify correct cell phone usage.
   b. Identify correct email, chat room, blogs, and MP3 player usage.
   c. Recognize signs of cyber-bullying.
   d. Understand correct usage of internet at work.
Resource Management
Course CIP Code: 20.0129

Course Description: Resource Management is a course which addresses the identification and management of personal resources and family finances to meet the needs and wants of individuals and families throughout the family life cycle, considering a broad range of economic, social, cultural, technological, environmental, and maintenance factors. (Grades 9-10-11-12, 1 Semester, .5 Carnegie Unit)

Executive Summary

**Course Name:** Resource Management  
**Course CIP Code:** 20.0129

1. Evaluate the relationship between decision-making and the quality of life.  
   a. Identify how personal decisions and their consequences affect the quality of an individual’s life.  
   b. Identify how decisions made by an individual affect the quality of life of other individuals, families, communities, and the larger society.  
   c. Examine values, goals, and standards and their interrelationships.  
   d. Practice effective decision-making techniques.  
   e. Discuss management styles in relationship to decision-making skills.  

2. Utilize available resources.  
   a. Distinguish between human and non-human resources.  
   b. Discuss the relationship between resources and decision-making.  
   c. Explain how to protect resources.  

3. Appraise the relationship between financial management and quality of life.  
   a. Identify how an individual’s financial management affects the quality of his/her life and others.  
   b. Apply decision-making skills and goal planning to financial management.  

4. Utilize banking services.  
   a. Identify the types of financial institutions.  
   b. Assess types of services offered by financial institutions.  
   c. Practice banking procedures.  

5. Employ a budget process to manage income and expenses.  
   a. List different sources of income.  
   b. Interpret a paycheck and explain deductions.  
   c. Recognize categories of expenses.  
   d. Distinguish between fixed and variable expenses.  
   e. Define the need for a budget.  
   f. Prepare a budget.  
   g. Evaluate the effectiveness of a budget plan.  

6. Analyze effective use of credit.  
   a. Distinguish among various types of credit.  
   b. Evaluate different sources of credit.  
   c. Recognize benefits and pitfalls of credit use.  
   d. Identify procedures for establishing and maintaining a good credit rating to include debt management.  
   e. Discuss interest rates.  

7. Analyze effective saving and investment practices.  
   a. Define a savings goal.  
   b. Compare and contrast various methods of savings and investing.  
   c. Discuss estate planning and inheritance.  

8. Analyze appropriate types of insurance for protecting personal assets.  
   a. Distinguish among types of life insurance.  
   b. Determine who needs life insurance coverage and the amount needed.  
   c. List health insurance coverage plans.  
   d. Identify basic types of automobile insurance coverage.
Executive Summary

e. List procedures to use in case of an automobile accident.
f. Identify types of property insurance.
g. Name the procedures for filing an insurance claim.

9. Distinguish among local, state, and federal tax assessments.
   a. Discuss local tax assessments to include property, automobile, and sales taxes.
   b. Compute local, state and federal income taxes.

10. Identify a consumer’s rights and responsibilities.
    a. Define the role of the consumer in the marketplace.
    b. Define consumer choice, consumer rights, and consumer responsibilities.
    c. Define the role of the consumer in dealing with sales people and merchants.
    d. Discuss simple contracts.

11. Evaluate consumer information.
    a. Interpret product labels.
    b. Interpret product guarantees and warranties.
    c. Describe the impact of advertising.
    d. Evaluate advertising for truthfulness.
    e. Identify procedures for filing a consumer complaint to include contesting an incorrect billing statement.
    f. Identify the protectors of the consumer - government, business and industry, and consumer organizations.
    g. Develop techniques for applying the decision-making process to consumer decisions.
    h. Identify ways to maximize family life through consumer decisions about food, clothing, housing, transportation, leisure, and major household purchases.

12. Demonstrate wise decision-making regarding the balance between personal and global/environmental concern.
    a. Identify practices which show respect for the environment through the wise use of resources.
    b. Identify specific approaches to managing waste properly.

13. Identify the relationship between work and quality of life.
    a. Recognize how individual satisfaction in the choice of work affects the quality of individual and family life.
    b. Compare how the unique differences of diverse family arrangements is impacted by type of work, e.g., dual worker families, families with part-time workers, and single parent families.

14. Describe the influence of families on the workplace.
    a. Discuss the Family and Medical Leave Act, including its nature and scope.
    b. Discuss employer-sponsored child care, including its nature and scope.
    c. Identify the various options available with flexible work scheduling.
    d. Identify the various options available with employer-assistance programs.

15. Identify techniques to enhance communications skills for balancing work and family.
    a. Identify the types of communication to include verbal and nonverbal forms.
    b. Demonstrate the ability to use "I" messages, "You" messages, and "We" messages.
    c. Identify approaches to enhancing communication within the family.

16. Identify techniques to enhance time management skills for balancing work and family.
Executive Summary

a. Identify the tools for managing time.
   b. Describe strategies for time management.
   c. Discuss the purpose and importance of record keeping, including what to keep and what to discard.

17. Identify techniques to enhance stress management skills for balancing work and family.
   a. Discuss the nature and scope of stress from a positive and negative standpoint.
   b. Identify factors contributing to stress among teens.
   c. Distinguish between the positive and negative stress relievers.

18. Identify techniques to enhance conflict resolution skills in balancing work and family.
   a. Discuss conflict, including types and their positive and negative natures.
   b. Discuss factors contributing to conflict.
   c. Discuss strategies for preventing conflict.
   d. Demonstrate approaches to handling conflict.

19. Identify techniques to enhance technology skills in balancing work and family.
   a. Identify ways to maximize home automation to meet family goals.
   b. Describe the influence of technology on the environment.

20. Evaluate the role of change in balancing work and family concerns.
   a. Discuss the nature of change as related to resource management (changing jobs, moving, unemployment, financial problems, etc.).
   b. Discuss the relationship of the rate of change and its effect on the quality of life.
   c. Adopt constructive techniques for initiating and responding to change.
Appendix A: Academic Standards

Algebra I

Competencies and Suggested Objective(s)

A1   Recognize, classify, and use real numbers and their properties.
     a. Describe the real number system using a diagram to show the relationships of component sets of numbers that compose the set of real numbers.
     b. Model properties and equivalence relationships of real numbers.
     c. Demonstrate and apply properties of real numbers to algebraic expressions.
     d. Perform basic operations on square roots excluding rationalizing denominators.

A2   Recognize, create, extend, and apply patterns, relations, and functions and their applications.
     a. Analyze relationships between two variables, identify domain and range, and determine whether a relation is a function.
     b. Explain and illustrate how change in one variable may result in a change in another variable.
     c. Determine the rule that describes a pattern and determine the pattern given the rule.
     d. Apply patterns to graphs and use appropriate technology.

A3   Simplify algebraic expressions, solve and graph equations, inequalities and systems in one and two variables.
     a. Solve, check, and graph linear equations and inequalities in one variable, including rational coefficients.
     b. Graph and check linear equations and inequalities in two variables.
     c. Solve and graph absolute value equations and inequalities in one variable.
     d. Use algebraic and graphical methods to solve systems of linear equations and inequalities.
     e. Translate problem-solving situations into algebraic sentences and determine solutions.

A4   Explore and communicate the characteristics and operations of polynomials.
     a. Classify polynomials and determine the degree.
     b. Add, subtract, multiply, and divide polynomial expressions.
     c. Factor polynomials using algebraic methods and geometric models.
     d. Investigate and apply real-number solutions to quadratic equations algebraically and graphically.
     e. Use convincing arguments to justify unfactorable polynomials.
     f. Apply polynomial operations to problems involving perimeter and area.

A5 Utilize various formulas in problem-solving situations.
   a. Evaluate and apply formulas (e.g., circumference, perimeter, area, volume, Pythagorean Theorem, interest, distance, rate, and time).
   b. Reinforce formulas experimentally to verify solutions.
   c. Given a literal equation, solve for any variable of degree one.
   d. Using the appropriate formula, determine the length, midpoint, and slope of a segment in a coordinate plane.
   e. Use formulas (e.g., point-slope and slope-intercept) to write equations of lines.

A6 Communicate using the language of algebra.
   a. Recognize and demonstrate the appropriate use of terms, symbols, and notations.
   b. Distinguish between linear and non-linear equations.
   c. Translate between verbal expressions and algebraic expressions.
   d. Apply the operations of addition, subtraction, and scalar multiplication to matrices.
   e. Use scientific notation to solve problems.
   f. Use appropriate algebraic language to justify solutions and processes used in solving problems.

A7 Interpret and apply slope as a rate of change.
   a. Define slope as a rate of change using algebraic and geometric representations.
   b. Interpret and apply slope as a rate of change in problem-solving situations.
   c. Use ratio and proportion to solve problems including direct variation (y=kx).
   d. Apply the concept of slope to parallel and perpendicular lines.

A8 Analyze data and apply concepts of probability.
   a. Collect, organize, graph, and interpret data sets, draw conclusions, and make predictions from the analysis of data.
   b. Define event and sample spaces and apply to simple probability problems.
   c. Use counting techniques, permutations, and combinations to solve probability problems.

Biology I

Competencies and Suggested Objective(s)

B1 Utilize critical thinking and scientific problem solving in designing and performing biological research and experimentation.
   a. Demonstrate the proper use and care for scientific equipment used in biology.
   b. Observe and practice safe procedures in the classroom and laboratory.
   c. Apply the components of scientific processes and methods in the classroom and laboratory investigations.

---

d. Communicate results of scientific investigations in oral, written, and graphic form.

B2 Investigate the biochemical basis of life.
   a. Identify the characteristics of living things.
   b. Describe and differentiate between covalent and ionic bonds using examples of each.
   c. Describe the unique bonding and characteristics of water that makes it an essential component of living systems.
   d. Classify solutions using the pH scale and relate the importance of pH to organism survival.
   e. Compare the structure, properties and functions of carbohydrates, lipids, proteins and nucleic acids in living organisms.
   f. Explain how enzymes work and identify factors that can affect enzyme action.

B3 Investigate cell structures, functions, and methods of reproduction.
   a. Differentiate between prokaryotic and eukaryotic cells.
   b. Distinguish between plant and animal (eukaryotic) cell structures.
   c. Identify and describe the structure and basic functions of the major eukaryotic organelles.
   d. Describe the way in which cells are organized in multicellular organisms.
   e. Relate cell membrane structure to its function in passive and active transport.
   f. Describe the main events in the cell cycle and cell mitosis including differences in plant and animal cell divisions.
   g. Relate the importance of meiosis to sexual reproduction and the maintenance of chromosome number.
   h. Identify and distinguish among forms of asexual and sexual reproduction.

B4 Investigate the transfer of energy from the sun to living systems.
   a. Describe the structure of ATP and its importance in life processes.
   b. Examine, compare, and contrast the basic processes of photosynthesis and cellular respiration.
   c. Compare and contrast aerobic and anaerobic respiration.

B5 Investigate the principles, mechanisms, and methodology of classical and molecular genetics.
   a. Compare and contrast the molecular structures of DNA and RNA as they relate to replication, transcription, and translation.
   b. Identify and illustrate how changes in DNA cause mutations and evaluate the significance of these changes.
   c. Analyze the applications of DNA technology (forensics, medicine, agriculture).
   d. Discuss the significant contributions of well-known scientists to the historical progression of classical and molecular genetics.
   e. Apply genetic principles to solve simple inheritance problems including monohybrid crosses, sex linkage, multiple alleles, incomplete dominance, and codominance.
   f. Examine inheritance patterns using current technology (gel electrophoresis, pedigrees, karyotypes).
B6 Investigate concepts of natural selection as they relate to diversity of life.
   a. Analyze how organisms are classified into a hierarchy of groups and subgroups based on similarities and differences.
   b. Identify characteristics of kingdoms including monerans, protists, fungi, plants and animals.
   c. Differentiate among major divisions of the plant and animal kingdoms (vascular/non-vascular; vertebrate/invertebrate).
   d. Compare the structures and functions of viruses and bacteria relating their impact on other living organisms.
   e. Identify evidence of change in species using fossils, DNA sequences, anatomical and physiological similarities, and embryology.
   f. Analyze the results of natural selection in speciation, diversity, adaptation, behavior and extinction.

B7 Investigate the interdependence and interactions that occur within an ecosystem.
   a. Analyze the flow of energy and matter through various cycles including carbon, oxygen, nitrogen and water cycles.
   b. Interpret interactions among organisms in an ecosystem (producer/consumer/decomposer, predator/prey, symbiotic relationships and competitive relationships).
   c. Compare variations, tolerances, and adaptations of plants and animals in major biomes.
   d. Investigate and explain the transfer of energy in an ecosystem including food chains, food webs, and food pyramids.
   e. Examine long and short-term changes to the environment as a result of natural events and human actions.

English II

Competencies and Suggested Objective(s)

E1 Produce writing which reflects increasing proficiency through planning, writing, revising, and editing and which is specific to audience and purpose.
   a. Produce individual and/or group compositions and/or projects to persuade, tell a story, describe, create an effect, explain or justify an action or event, inform, entertain, etc.
   b. Produce writing typically used in the workplace such as social, business, and technical correspondence; explanation of procedures; status reports; research findings; narratives for graphs; justification of decisions, actions, or expenses; etc.
   c. Write a response, reaction, interpretation, analysis, summary, etc., of literature, other reading matter, or orally presented material.
   d. Revise to ensure effective introductions, details, wording, topic sentences, and conclusions.

Executive Summary

E2 Communicate ideas for a variety of school and other life situations through listening, speaking, and reading aloud.
   a. Listen to determine the main idea and supporting details, to distinguish fact from opinion, and to determine a speaker's purpose or bias.
   b. Speak with appropriate intonation, articulation, gestures, and facial expression.
   c. Speak effectively to explain and justify ideas to peers, to inform, to summarize, to persuade, to entertain, to describe, etc.

E3 Read, evaluate, and use print, non-print, and technological sources to research issues and problems, to present information, and to complete projects.
   a. Read, view, and listen to distinguish fact from opinions and to recognize persuasive and manipulative techniques.
   b. Access both print and non-print sources to produce an I-Search paper, research paper, or project.
   c. Use computers and audio-visual technology to access and organize information for purposes such as resumes, career search projects, and analytical writings, etc.
   d. Use reference sources, indices, electronic card catalog, and appropriate research procedures to gather and synthesize information.

E4 Work individually and as a member of a team to analyze and interpret information, to make decisions, to solve problems, and to reflect, using increasingly complex and abstract thinking.
   a. Interact with peers to examine real world and literary issues and ideas.
   b. Show growth in critical thinking, leadership skills, consensus building, and self-confidence by assuming a role in a group, negotiating compromise, and reflecting on individual or group work.

E5 Complete oral and written presentations which exhibit interaction and consensus within a group.
   a. Share, critique, and evaluate works in progress and completed works through a process approach.
   b. Communicate effectively in a group to present completed projects and/or compositions.
   c. Edit oral and written presentations to reflect correct grammar, usage, and mechanics.

E6 Explore cultural contributions to the history of the English language and its literature.
   a. Explore a variety of works from various historical periods, geographical locations, and cultures, recognizing their influence on language and literature.
   b. Identify instances of dialectal differences which create stereotypes, perceptions, and identities.
   c. Recognize root words, prefixes, suffixes, and cognates.
   d. Relate how vocabulary and spelling have changed over time.

E7 Discover the power and effect of language by reading and listening to selections from various literary genres.
   a. Listen to and read aloud selected works to recognize and respond to the rhythm and power of language to convey a message.
b. Read aloud with fluency and expression.
c. Analyze the stylistic devices, such as alliteration, assonance, word order, rhyme, onomatopoeia, etc., that make a passage achieve a certain effect.
d. Demonstrate how the use of language can confuse or inform, repel or persuade, or inspire or enrage.
e. Analyze how grammatical structure or style helps to create a certain effect.

E8 Read, discuss, analyze, and evaluate literature from various genres and other written material.
   a. Read and explore increasingly complete works, both classic and contemporary, for oral discussion and written analysis.
   b. Read, discuss, and interpret literature to make connections to life.
   c. Read from a variety of genres to understand how the literary elements contribute to the overall quality of the work.
   d. Identify qualities in increasingly complex literature that have produced a lasting impact on society.
   e. Read for enjoyment, appreciation, and comprehension of plot, style, vocabulary, etc.

E9 Sustain progress toward fluent control of grammar, mechanics, and usage of standard English in the context of writing and speaking.
   a. Infuse the study of grammar and vocabulary into written and oral communication.
   b. Demonstrate, in the context of their own writing, proficient use of the conventions of standard English, including, but not limited to, the following: complete sentences, subject-verb agreement, plurals, spellings, homophones, possessives, verb forms, punctuation, capitalization, pronouns, pronoun-antecedent agreement, parallel structure, and dangling and misplaced modifiers.
   c. Give oral presentations to reinforce the use of standard English.
   d. Employ increasingly proficient editing skills to identify and solve problems in grammar, usage, and structure.

E10 Use language and critical thinking strategies to serve as tools for learning.
   a. Use language to facilitate continuous learning, to record observations, to clarify thought, to synthesize information, and to analyze and evaluate language.
   b. Interpret visual material orally and in writing.
Executive Summary

U. S. History from 1877

Competencies and Suggested Objective(s)

H1 Explain how geography, economics, and politics have influenced the historical development of the United States in the global community.
   a. Apply economic concepts and reasoning when evaluating historical and contemporary social developments and issues (e.g., gold standard, free coinage of silver, tariff issue, laissez faire, deficit spending, etc.).
   b. Explain the emergence of modern America from a domestic perspective (e.g., frontier experience, Industrial Revolution and organized labor, reform movements of Populism and Progressivism, Women’s Movement, Civil Rights Movement, the New Deal, etc.).
   c. Explain the changing role of the United States in world affairs since 1877 through wars, conflicts, and foreign policy (e.g., Spanish-American War, Korean conflict, containment policy, etc.).
   d. Trace the expansion of the United States and its acquisition of territory from 1877 (e.g., expansionism and imperialism).

H2 Describe the impact of science and technology on the historical development of the United States in the global community.
   a. Analyze the impact of inventions on the United States (e.g., telephone, light bulb, etc.).
   b. Examine the continuing impact of the Industrial Revolution on the development of our nation (e.g., mass production, computer operations, etc.).
   c. Describe the effects of transportation and communication advances since 1877.

H3 Describe the relationship of people, places, and environments through time.
   a. Analyze human migration patterns since 1877 (e.g., rural to urban, the Great Migration, etc.).
   b. Analyze how changing human, physical, geographic characteristics can alter a regional landscape (e.g., urbanization, Dust Bowl, etc.).

H4 Demonstrate the ability to use social studies tools (e.g., timelines, maps, globes, resources, graphs, a compass, technology, etc.).
   a. Interpret special purpose maps, primary/secondary sources, and political cartoons.
   b. Analyze technological information on graphs, charts, and timelines.
   c. Locate areas of international conflict (e.g., Caribbean, Southeast Asia, Europe, etc.).

H5 Analyze the contributions of Americans to the ongoing democratic process to include civic responsibilities.
   a. Examine various reform movements (e.g., Civil Rights, Women’s Movement, etc.).

---

b. Examine the government’s role in various movements (e.g., arbitration, 26th Amendment, etc.).

c. Examine the role of government in the preservation of citizens’ rights (e.g., 19th Amendment, Civil Rights Act of 1964).

d. Examine individuals’ duties and responsibilities in a democratic society (e.g., voting, volunteerism, etc.).
Appendix B: 21st Century Skills

CS1 Global Awareness
- Using 21st century skills to understand and address global issues
- Learning from and working collaboratively with individuals representing diverse cultures, religions, and lifestyles in a spirit of mutual respect and open dialogue in personal, work, and community contexts
- Promoting the study of non-English language as a tool for understanding other nations and cultures

CS2 Financial, Economic, and Business Literacy
- Knowing how to make appropriate personal economic choices
- Understanding the role of the economy and the role of business in the economy
- Applying appropriate 21st century skills to function as a productive contributor within an organizational setting
- Integrating oneself within and adapting continually to our nation’s evolving economic and business environment

CS3 Civic Literacy
- Being an informed citizen to participate effectively in government
- Exercising the rights and obligations of citizenship at local, state, national, and global levels
- Understanding the local and global implications of civic decisions
- Applying 21st century skills to make intelligent choices as a citizen

CS4 Information and Communication Skills
- Information and media literacy skills: Analyzing, accessing, managing, integrating, evaluating, and creating information in a variety of forms and media; understanding the role of media in society
- Communication skills: Understanding, managing, and creating effective oral, written, and multimedia communication in a variety of forms and contexts

CS5 Thinking and Problem-Solving Skills
- Critical thinking and systems thinking: Exercising sound reasoning in understanding and making complex choices, understanding the interconnections among systems
- Problem identification, formulation, and solution: Ability to frame, analyze, and solve problems
- Creativity and intellectual curiosity: Developing, implementing, and communicating new ideas to others, staying open and responsive to new and diverse perspectives

CS6 Interpersonal and Self-Directional Skills
- Interpersonal and collaborative skills: Demonstrating teamwork and leadership, adapting to varied roles and responsibilities, working productively with others, exercising empathy, respecting diverse perspectives
- Self-direction: Monitoring one’s own understanding and learning needs, locating appropriate resources, transferring learning from one domain to another

---

Executive Summary

- Accountability and adaptability: Exercising personal responsibility and flexibility in personal, workplace, and community contexts; setting and meeting high standards and goals for one’s self and others; tolerating ambiguity
- Social responsibility: Acting responsibly with the interests of the larger community in mind; demonstrating ethical behavior in personal, workplace, and community contexts
MISSISSIPPI CURRICULUM FRAMEWORKS FOR VOCATIONAL–TECHNICAL PROGRAMS

POSTSECONDARY EXECUTIVE SUMMARY

2008
The Mississippi Department of Education, Office of Vocational Education and Workforce Development does not discriminate on the basis of race, color, religion, national origin, sex, age, or disability in the provision of educational programs and services or employment opportunities and benefits. The following office has been designated to handle inquiries and complaints regarding the non-discrimination policies of the Mississippi Department of Education: Director, Office of Human Resources, Mississippi Department of Education, 359 North West Street, Suite 359, Jackson, Mississippi 39201, (601) 359-3511.
EXECUTIVE SUMMARY

FOREWORD

As the world economy continues to evolve, businesses and industries must adopt new practices and processes in order to survive. Quality and cost control, work teams and participatory management, and an infusion of technology are transforming the way people work and do business. Employees are now expected to read, write, and communicate effectively; think creatively, solve problems, and make decisions; and interact with each other and the technologies in the workplace. Vocational–technical programs must also adopt these practices in order to provide graduates who can enter and advance in the changing work world.

The curriculum framework in this document reflects these changes in the workplace and a number of other factors that impact local vocational–technical programs. Federal and state legislation calls for articulation between high school and community college programs, integration of academic and vocational skills, and the development of sequential courses of study that provide students with the optimum educational path for achieving successful employment. National skills standards, developed by industry groups and sponsored by the U.S. Department of Education and Labor, provide vocational educators with the expectations of employers across the United States. All of these factors are reflected in the framework found in this document.

Referenced throughout the courses of the curriculum are the 21st Century Skills, which were developed by the Partnership for 21st Century Skills, a group of business and education organizations concerned about the gap between the knowledge and skills learned in school and those needed in communities and the workplace. A portion of the 21st Century Skills addresses learning skills needed in the 21st century, including information and communication skills, thinking and problem-solving skills, and interpersonal and self-directional skills. The need for these types of skills has been recognized for some time, and the 21st Century Skills are adapted in part from the 1991 report from the U.S. Secretary of Labor’s Commission on Achieving Necessary Skills (SCANS). Another important aspect of learning and working in the 21st century involves technology skills, and the International Society for Technology in Education, developers of the National Educational Technology Standards (NETS), were strategic partners in the Partnership for 21st Century Skills.

Each postsecondary program of instruction consists of a program description and a suggested sequence of courses that focus on the development of occupational competencies. Each vocational–technical course in this sequence has been written using a common format, which includes the following components:

- Course Name – A common name that will be used by all community/junior colleges in reporting students
- Course Abbreviation – A common abbreviation that will be used by all community/junior colleges in reporting students
• Classification – Courses may be classified as the following:
  o Vocational–technical core – A required vocational–technical course for all students
  o Area of concentration (AOC) core – A course required in an area of concentration of a cluster of programs
  o Vocational–technical elective – An elective vocational–technical course
  o Related academic course – An academic course that provides academic skills and knowledge directly related to the program area
  o Academic core – An academic course that is required as part of the requirements for an associate’s degree

• Description – A short narrative that includes the major purpose(s) of the course and the recommended number of hours of lecture and laboratory activities to be conducted each week during a regular semester

• Prerequisites – A listing of any courses that must be taken prior to or on enrollment in the course

• Corequisites – A listing of courses that may be taken while enrolled in the course

• Competencies and Suggested Objectives – A listing of the competencies (major concepts and performances) and of the suggested student objectives that will enable students to demonstrate mastery of these competencies

The following guidelines were used in developing the program(s) in this document and should be considered in compiling and revising course syllabi and daily lesson plans at the local level:

• The content of the courses in this document reflects approximately 75% of the time allocated to each course. The remaining 25% of each course should be developed at the local district level and may reflect the following:
  o Additional competencies and objectives within the course related to topics not found in the state framework, including activities related to specific needs of industries in the community college district
  o Activities that develop a higher level of mastery on the existing competencies and suggested objectives
  o Activities and instruction related to new technologies and concepts that were not prevalent at the time the current framework was developed and revised
  o Activities that implement components of the Mississippi Tech Prep initiative, including integration of academic and vocational–technical skills and course work, school-to-work transition activities, and articulation of secondary and postsecondary vocational–technical programs
  o Individualized learning activities, including worksite learning activities, to prepare individuals better in the courses for their chosen occupational areas
• Sequencing of the course within a program is left to the discretion of the local district. Naturally, foundation courses related to topics such as safety, tool and equipment usage, and other fundamental skills should be taught first. Other courses related to specific skill areas and related academics, however, may be sequenced to take advantage of seasonal and climatic conditions, resources located outside of the school, and other factors.

• Programs that offer an Associate of Applied Science degree must include a minimum 15 semester credit hour academic core. Specific courses to be taken within this core are to be determined by the local district. Minimum academic core courses are as follows:
  - 3 semester credit hours  Math/Science Elective
  - 3 semester credit hours  Written Communications Elective
  - 3 semester credit hours  Oral Communications Elective
  - 3 semester credit hours  Humanities/Fine Arts Elective
  - 3 semester credit hours  Social/Behavioral Science Elective

It is recommended that courses in the academic core be spaced out over the entire length of the program so that students complete some academic and vocational–technical courses each semester. Each community/junior college has the discretion to select the actual courses that are required to meet this academic core requirement.

• Technical elective courses have been included to allow community colleges and students to customize programs to meet the needs of industries and employers in their areas.

In order to provide flexibility within the districts, individual courses within a framework may be customized by:
  • adding new competencies and suggested objectives.
  • revising or extending the suggested objectives for individual competencies.
  • adjusting the semester credit hours of a course to be up one hour or down one hour (after informing the State Board for Community and Junior Colleges [SBCJC] of the change).

In addition, the curriculum framework as a whole may be customized by:
  • resequencing courses within the suggested course sequence.
  • developing and adding a new course that meets specific needs of industries and other clients in the community or junior college district (with SBCJC approval).
  • utilizing the technical elective options in many of the curricula to customize programs.

Program Description

Automotive Vehicles and Accessories Marketing Operations includes theory, laboratory, shop work, and other specialized learning experiences relative to receiving, stocking, selling, and shipping merchandise in the automotive aftermarket. Included is the study of mathematical procedures related to business operation, engine theory and operation, automotive systems, the use of office machines, auto parts store management, customer relations, and computer-based instruction.

Specific training will enable the student to ascertain the correct part required by the customer, advise the customer according to the description given, read various catalogs to determine the stock number and price, measure engine parts, mix paint, display merchandise, determine correct interchange parts, accept telephone orders, and take inventory.

Instruction emphasizes distribution of parts and services within the automotive aftermarket in establishments such as distributors, jobbers, retail part stores, specialty shops, car dealers, independent garages, fleet garages, and service stations.

Automotive Vehicles and Accessories Marketing Operations is a 1-year certificate program designed to prepare automotive parts salespersons for entry-level positions in automotive parts marketing.

This document was developed according to national standards for automotive parts service as prepared in The Official ASE Catalog of Test/Parts Specialist by the National Institute for Automotive Service Excellence in Leesburg, VA.

Business and Marketing Management Technology

The Business and Marketing Management Technology program of study is designed to provide specialized occupational instruction in all phases of marketing management including e-business, international marketing, and multimedia presentations. This program prepares students for careers in dynamic marketing professions. A combination of classwork and practical experience is stressed. Completion of the 2-year program leads to an associate’s degree in Applied Science.

Fashion Marketing Technology

The Fashion Marketing Technology program of study is designed to provide specialized instruction in all phases of fashion marketing in order to prepare students for careers in fashion and its related professions and industries such as manager, wardrobe consultant, buyer, sale representative, visual merchandiser, and fashion director. A combination of classwork and practical experience is stressed. A Certificate of Fashion Marketing may be issued at the discretion of the local district. The Associate of Applied Science degree is earned upon successful completion of the Fashion Marketing Technology program.

The Food Production and Management Technology curriculum provides a Vocational Certificate and an Associate of Applied Science degree. Students may receive a certificate after completing 34 semester hours of vocational–technical courses. The program for an Associate of Applied Science degree is available for students completing 70 semester hours, which include 15 semester hours of academic credit. The program offers study in areas of food production, management, and service for restaurant operations, quantity food operations, and catering businesses. Emphasis is placed on technical skills in preparing students for entry-level job opportunities in production and management in both commercial and institutional food service settings.

Industry standards referenced are from the National Restaurant Association Educational Foundations ServSafe® and ManageFirst programs.

IRRIGATION MANAGEMENT TECHNOLOGY

Irrigation Management Technology is designed to provide students with skills that lead to employment in residential and commercial irrigation industries. The program includes training in the areas of irrigation system design and installation, system troubleshooting and repair, and irrigation business and shop management. Students enrolled in the program have the options of taking a 1-year course of study and receiving a technical certificate or taking a 2-year course of study and receiving an Associate of Applied Science degree. A minimum of 42 semester credit hours is required to earn the technical certificate. A minimum of 72 semester credit hours is required to earn the Associate of Applied Science degree. Students who complete the program will be qualified to sit for the Certified Landscape or Certified Golf Irrigation Auditor’s examinations after earning 1 year of experience in the field. Students will be qualified to sit for the Certified Irrigation Contractor and Certified Irrigation Designer examination after earning 2 years of experience in the field. Students may sit for the first two steps of the Certified Irrigation Designer examination upon completion of the program. The remaining steps (3 and 4) may be completed after obtaining 2 years of field experience.

Required courses for a technical certificate in Irrigation Management Technology include the following:

2 sch Introduction to Irrigation (IRM 1112)
3 sch Residential Irrigation Design (IRM 1123)
4 sch Irrigation Systems Installation I (IRM 1144)
3 sch Irrigation Systems Installation II (IRM 1243)

The Massage Therapy program is a 1-year certificate program designed to prepare students for careers as professional massage therapists. The curriculum prepares students to develop knowledge and skills for practicing massage therapy. Core courses emphasize massage therapy principles, ethics, business application, pathology, anatomy and physiology, technique modalities, and kinesiology. Students completing this program should be able to find jobs in employment settings such as spas, clinics, fitness centers, wellness centers, corporations, sports organizations, doctors’ offices, and private practices.

Industry standards referenced are from the National Certification Examination for Therapeutic Massage and Bodywork Content Outline.

PHARMACY TECHNOLOGY

The Pharmacy Technology curriculum is a 2-year program of study designed to prepare the student for employment and advancement in the pharmacy field. The curriculum requires a minimum of 72 hours of courses in order to obtain an Associate of Applied Science degree. CPR-Health Care Provider is a prerequisite for the program.

Pharmacy technicians assist and support licensed pharmacists in providing direct patient care and medications to patients. Pharmacy technicians must work under the direction of a licensed pharmacist. Employers include pharmacies based in hospitals, retail settings, home health care, nursing homes, clinics, nuclear medicine settings, and mail order prescription companies. Nontraditional employers for pharmacy technicians include medical insurance companies, medical computer software companies, drug manufacturing companies, drug wholesale companies, and food processing companies. The one requirement these pharmacy technician duties have in common is a need for absolute accuracy and precision in the technical and clerical aspects of this career.

Upon graduation from the program, the student is eligible to take the Pharmacy Technician Certification Board (PTCB) Pharmacy Technician Certification Exam.
Executive Summary

Suggested Course Sequence*
Pharmacy Technology

FIRST YEAR

1 sch Pharmacy Technician Fundamentals (PHM 1111)
3 sch Pharmacy Law (PHM 1123)
2 sch Computer Applications in Pharmacy (PHM 1212)
3 sch Pharmacy Anatomy and Physiology (PHM 1413)
3 sch Intermediate Algebra (MAT 1233) or higher
3 sch Written Communications Elective

15 sch

SUMMER TERM

2 sch Pharmaceutical Compounding (PHM 1512)
4 sch Practicum I (PHM 2614)

SECOND YEAR

4 sch Pharmacology II (PHM 2434)
4 sch Nonprescription Medications and Devices (PHM 2534)
4 sch Practicum II (PHM 2624)
3 sch Oral Communications Elective

15 sch

4 sch Drug Information Research (PHM 2543)
4 sch Practicum III (PHM 2634)
5 sch Pharmacy Management (PHM 2715)
3 sch Pharmacy Transition (PHM 2813)
3 sch Humanities/Fine Arts Elective

18 sch

* Students who lack entry-level skills in math, English, science, and so forth will be provided related studies.
PIPEFITTER/STEAMFITTER

The Pipefitter/Steamfitter program includes a basic core of courses designed to prepare a student for a variety of entry-level positions in the industrial setting. This document was developed with the use of the competencies and objectives as prepared by the National Center for Construction Education and Research (NCCER), along with applicable national, state, and local codes.

Upon successful completion of a minimum of 32 semester hours of required courses, the student will be eligible to receive a certificate in pipefitting.
Suggested Course Sequence*
Pipefitter/Steamfitter

Certificate Option

FIRST YEAR

3 sch Fundamentals of Plumbing/Pipefitting (PPV/PCT 1113)
3 sch Tacking, Brazing, and Burning (PPV/PCT 1213)
3 sch Blueprint Reading for Piping Trades (PPV 1313)
3 sch Sketching (PPV/PCT 1323)
1 sch Pressure Boilers (PPV/PCT 1411)
6 sch Basic Fabrication for Pipefitting (PPV 1426)

2 sch Pipe Specifications and Systems (PPV 1432)
2 sch Rigging and Signaling (PPV/PCT 1812)
6 sch Vocational–Technical Electives**
6 sch Advanced Pipefitting Lab (PPV 1456)

16 sch

* Students who lack entry-level skills in math, English, science, and so forth will be provided related studies.

**APPROVED VOCATIONAL–TECHNICAL ELECTIVES

3 sch Piping Level/Transit (PPV/PCT 1443)
3 sch Steel Ship Building and Marine Construction (PPV 1823)
1–3 sch Special Project in Pipefitting [PPV 291(1–3)]
1–6 sch Supervised Work Experience in Pipefitting [PPV 292(1–6)]
2 sch Domestic Systems (PPV/PCT 1712)
2 sch Plumbing Fixtures Lab (PPV/PCT 1722)
Executive Summary

PLUMBING TECHNOLOGY

The Plumbing Technology program prepares a person for advanced placement in plumbing and related fields. Graduates of this program can take the journeyperson exam and become employed as supervisors, instructors, material expeditors, inspectors, estimators, consultants, employers, or contractors. This document was developed with the use of the competencies and objectives as prepared by the National Center for Construction Education and Research (NCCER), along with applicable national, state, and local codes.

Upon successful completion of a minimum of 32 semester hours of required courses, the student will be eligible to receive a certificate in plumbing. An associate’s degree program in plumbing is also available.

The Practical Nursing program prepares the individual to assist in providing general nursing care requiring basic knowledge of the biological, physical, behavioral, psychological, and sociological sciences; and of nursing procedures that do not require the skills, judgment, and knowledge required of a registered nurse. This care is performed under the direction of a registered nurse, licensed physician, or dentist.

Students that complete the program requirements, 3 semesters, as identified by the Mississippi Department of Education, will be eligible to apply for LPN licensure. The graduate of the program functions as a provider of care and a member of a profession. This curriculum references the Client Needs Categories from the Test Plan for the National Council Licensure Examination for Licensed Practical/Vocational Nurses®.

**Program Total Clock Hours = 957.5**

**Semester Hours = 43**

Note: Clinical simulations in a lab environment may be used as clinical hours.
Process Operations Technology programs prepare technicians for employment in the diverse field of process operations in petroleum refineries, power generation facilities, pharmaceutical plants, chemical plants, wastewater treatment plants, food and beverage process plants, offshore oil production facilities, and a host of other industries. Individuals currently employed as process operations technicians will enhance their ability to perform their duties and increase opportunities to advance.

This curriculum leads to an Associate of Applied Science degree in Process Operations Technology. Graduates are prepared for entry-level positions at any processing facility. They will have acquired the basic technical skills in equipment and systems and have a broadened vocabulary to make the job-specific learning less difficult. They will also possess team-building skills, safety awareness, environmental awareness, communication skills, and computer skills that are critical in the workplace. They will have a working knowledge of state and federal regulations on safety and the environment. Through an internship program, students have the opportunity to work in a position related to process technology during which they will receive work-related application of their classroom training.

PROGRAM REQUIREMENTS

The standard curriculum for Process Operations Technology is based upon the review of documents, curricula guides, reference guides, state and federal regulations, input from the program advisory committee, and a writing team. The listing of tasks from these sources served as baseline data for the development of this curriculum. The task list used in this curriculum is based upon the following assumptions:

- In all areas, appropriate theory, safety, and support instruction will be provided for each task. It is essential that all instruction include use of appropriate tools, testing, and measuring instruments needed to accomplish certain tasks. It is also assumed that each student has received instruction to locate and use current reference materials from industry publications that present manufacturers’ recommended or required specifications and procedures for doing the various tasks.

- The individual program should have written and detailed evaluation standards for each task covered in the curriculum. Learning progress of students should be monitored and evaluated against these stated standards. A system that informs all students of their progress throughout the program should be in place.

- It is recognized that individual courses will differ across the technical programs. The development of appropriate learning activities and tests will be the responsibility of the individual program.
• These standards require that tasks contained in the list be included in the program to validate that the program is meeting the needs of the industry.

The curriculum framework for Process Operations Technology is designed to serve as the core curriculum for approximately 75% of each course at the postsecondary level. The remaining 25% of each course is to be added at the local level based upon the needs of students and area employers. The technical program in Process Operations Technology requires a minimum of 65 semester credit hours (sch) including 15 semester credit hours of academic core courses and 3 hours of computer competency.

The curriculum is consistent with the Gulf Coast Process Technology Alliance curriculum requirement of eight core curriculum modules for program endorsement and the program recommendations promulgated by the National Science Foundation and the Center for the Advancement of Process Technology. Graduates from the program will be eligible to take the National Certified Exit Exam for Process Operation Technicians.

The Sheet Metal Technology program prepares individuals to lay out, fabricate, erect or install, and maintain items made of steel, copper, stainless steel, and aluminum using hand tools and machines such as cornice brakes, forming rolls, and squaring shears. Instruction in sheet metal work can be placed in two basic categories: (1) building trades sheet metal work and (2) precision sheet metal work.

The building trades sheet metal workers construct and install various types of ducts that are connected to form systems through which air is passed. These systems are referred to as heating, ventilating, and air-conditioning systems. They are needed in homes, stores, apartments, offices, schools, hotels, shops, airplanes, and trains. Building trades sheet metal workers make and install gutters, downspouts, blow pipes, and industrial exhaust systems, and they construct metal roofs and metal buildings.

Precision or production sheet metal workers employed in industry produce parts used in various types of products and equipment for aircraft, missiles, electronics, communications, data processing, computers, defense, military, photography, radiography, restaurants, food processing, air handling, laboratories, appliances, spaceships, shipbuilding, sign manufacturing, and transportation.

This curriculum was developed by utilizing the competencies and objectives for the sheet metal industry as established by the National Center for Construction Education and Research (NCCER).

Upon the successful completion of the minimum of 33 semester hours of required college credit, the student will be eligible for a Certificate in Sheet Metal.

Upon completion of the required 66 semester hours in the Sheet Metal Technology program, the student will be eligible for an Associate of Applied Science Degree.

LISTING OF COURSES

AUTOMOTIVE VEHICLES AND ACCESSORIES MARKETING OPERATIONS

Course Name: Orientation and Safety Procedures
Course Abbreviation: AAV 1112
Classification: Vocational–Technical Core
Description: An orientation to the history of accessories marketing, job opportunities, and the physical structure of the industry. Safety procedures including OSHA and EPA regulations, proper use of hand and power tools, shop hazards, and legal responsibilities are discussed and implemented throughout this course. (2 sch: 2-hr lecture)
Prerequisite: None

Course Name: Operational Procedures
Course Abbreviation: AAV 1126
Classification: Vocational–Technical Core
Description: Everyday operations in the auto parts business, including proper business procedures, customer service, and sales procedures (6 sch: 3-hr lecture, 6-hr lab)
Prerequisite: None

Course Name: Automotive Systems I
Course Abbreviation: AAV 1214
Classification: Vocational–Technical Core
Description: Function and identification of the power train, including engine, transmission, drive line, and axles (4 sch: 1-hr lecture, 6-hr lab)
Prerequisite: None

Course Name: Automotive Systems II
Course Abbreviation: AAV 1224
Classification: Vocational–Technical Core
Description: Function and identification of automotive systems, including brake systems, cooling systems, electrical systems, heating and air-conditioning systems, and suspension systems (4 sch: 1-hr lecture, 6-hr lab)
Prerequisite: None

Course Name: Catalog Information Systems
Course Abbreviation: AAV 1316
Classification: Vocational–Technical Core
Executive Summary

**Description:** Hard copy, microfiche, and computerized catalogs. Also included are the writing of invoices, interpreting price sheets, and calculating discounts. (6 sch: 3-hr lecture, 6-hr lab)

**Prerequisite:** None

*    *    *    *    *

**Course Name:** Merchandising
**Course Abbreviation:** AAV 1322
**Classification:** Vocational–Technical Core

**Description:** General parts store layout to include merchandise displays and parts bin layout (2 sch: 1-hr lecture, 2-hr lab)

**Prerequisite:** None

*    *    *    *    *

**Course Name:** Internal Operations
**Course Abbreviation:** AAV 1414
**Classification:** Vocational–Technical Core

**Description:** Daily operations of a parts store including shipping and receiving, stocking and storing merchandise, counter operations, and physical inventory (4 sch: 1-hr lecture, 6-hr lab)

**Prerequisite:** None

*    *    *    *    *

**Course Name:** Internal Sales
**Course Abbreviation:** AAV 1424
**Classification:** Vocational–Technical Core

**Description:** Sales skills using hard copy and computerized cataloging and pricing (4 sch: 1-hr lecture, 6-hr lab)

**Prerequisite:** None

*    *    *    *    *

**Course Name:** Work-Based Learning I, II, III, IV, V, and VI
**Course Abbreviation:** WBL 191(1–3), WBL 192(1–3), WBL 193(1–3), WBL 291(1–3), WBL 292(1–3), and WBL 293(1–3)
**Classification:** Free Elective

**Description:** A structured worksite learning experience in which the student, program area teacher, Work-Based Learning Coordinator, and worksite supervisor/mentor develop and implement an educational training agreement. Designed to integrate the student’s academic and technical skills into a work environment. May include regular meetings and seminars with school personnel and employers for supplemental instruction and progress reviews. (1–3 sch: 3- to 9-hr externship)

**Prerequisite:** Concurrent enrollment in vocational–technical program area courses

*    *    *    *    *

**Course Name:** Supervised Work Experience in Automotive Vehicles and Accessories Marketing Operations
**Course Abbreviation:** AAV 192(1–6)
**Classification:** Vocational–Technical Core
Executive Summary

**Description:** A course that is a cooperative program between industry and education designed to integrate the student’s technical studies with industrial experience. Variable credit is awarded on the basis of 1 semester hour per 45 industrial contact hours. (1–6 sch: 3- to 18-hr externship)

**Prerequisite:** Consent of instructor and completion of at least one semester of advanced coursework in Automotive Vehicles and Accessories Marketing Operations
BUSINESS AND MARKETING MANAGEMENT AND RELATED TECHNOLOGY

**Course Name:** Principles of Marketing  
**Course Abbreviation:** MMT 1113  
**Classification:** Vocational–Technical Core  
**Description:** Study of principles and problems of marketing goods and services and methods of distribution from producer to consumer. Types, functions, and practices of wholesalers and retailers and efficient techniques in the development and expansion of markets. (3 sch: 3-hr lecture)  
**Prerequisite:** None

**Course Name:** Marketing Management  
**Course Abbreviation:** MMT 1123  
**Classification:** Vocational–Technical Core  
**Description:** A project-based course as a continuation of MMT 1113 (3 sch: 3-hr lecture)  
**Prerequisite:** Principles of Marketing (MMT 1113)

**Course Name:** Personal Selling  
**Course Abbreviation:** MMT 1313  
**Classification:** Vocational–Technical Core  
**Description:** Basic principles and techniques of professional sales and their practical application. Topics include basic elements of consumer behavior, developing selling strategies, closing and servicing a sale, and developing consumer relations. (3 sch: 3-hr lecture)  
**Prerequisite:** None

**Course Name:** Advertising  
**Course Abbreviation:** MMT 1323  
**Classification:** Vocational–Technical Core  
**Description:** The role of advertising as a promotional tool. Topics included are product and consumer analysis, media selection, and creation of advertisements. (3 sch: 3-hr lecture)  
**Prerequisite:** None

**Course Name:** Merchandising Math  
**Course Abbreviation:** MMT 1413  
**Classification:** Vocational–Technical Elective  
**Description:** Study of the mathematical calculations involved in the merchandising process. Fundamental principles and operations in buying, pricing, and inventory control. (3 sch: 3-hr lecture)  
**Prerequisite:** None
Executive Summary

*    *    *    *    *

Course Name: Marketing Seminar or Marketing Seminar I, II, III, IV  
Course Abbreviation: MMT 1753 or MMT 1711, MMT 1721, MMT 1731, MMT 1741  
Classification: Vocational–Technical Elective  
Description: Develops leadership skills and human relations skills necessary for success in the field of marketing management. Special programs and activities will address topics directly related to marketing careers and career development. Emphasis will be placed on developing civic, social, and business responsibilities. (3 sch: 6-hr lab or 1 sch: 2-hr lab)  
Prerequisite: None

*    *    *    *    *

Course Name: Principles of Management  
Course Abbreviation: MMT 2213  
Classification: Vocational–Technical Core  
Description: Study of the basic principles and functions of organizational management with special emphasis on planning, organizing, directing, staffing, and controlling (3 sch: 3-hr lecture)  
Prerequisite: None

*    *    *    *    *

Course Name: Human Resource Management  
Course Abbreviation: MMT 2233  
Classification: Vocational–Technical Core  
Description: Objectives, organization, and functions of human resource management. Emphasis is placed on selection and placement, job evaluation, training, education, safety, health, employer–employee relationships, and employee services. (3 sch: 3-hr lecture)  
Prerequisite: None

*    *    *    *    *

Course Name: Marketing Case Studies  
Course Abbreviation: MMT 2243  
Classification: Vocational–Technical Elective  
Description: The study of effective marketing management decision making through case study analysis (3 sch: 3-hr lecture)  
Prerequisite: Marketing Management (MMT 1123)

*    *    *    *    *

Course Name: E-Commerce Marketing  
Course Abbreviation: MMT 2313  
Classification: Vocational–Technical Core  
Description: This course introduces the fundamental opportunities and challenges associated with e-commerce activities. Topics include designing the user interface, Web security, electronic payment systems, promotion, and legal issues involved in creating a functioning online business. (3 sch: 3-hr lecture)  
Prerequisite: None
Course Name: Multimedia Presentations for Marketing  
Course Abbreviation: MMT 2333  
Classification: Vocational–Technical Elective  
Description: Design and deliver multimedia marketing presentations through the use of appropriate multimedia software and tools. Topics include marketing design concepts and related marketing communication strategies. (3 sch: 2-hr lecture, 2-hr lab)  
Prerequisite: None

Course Name: Marketing Web Page Design  
Course Abbreviation: MMT 2343  
Classification: Vocational–Technical Elective  
Description: Use creative marketing strategies, concepts, and techniques to design Web sites that will reach designated target markets. (3 sch: 2-hr lecture, 2-hr lab)  
Prerequisite: None

Course Name: Retail Management  
Course Abbreviation: MMT 2423  
Classification: Vocational–Technical Elective  
Description: Study of retailing processes including functions performed, principles governing effective operation, and managerial problems resulting from current economic and social trends (3 sch: 3-hr lecture)  
Prerequisite: None

Course Name: Entrepreneurship  
Course Abbreviation: MMT 2513  
Classification: Vocational–Technical Elective  
Description: Overview of activities that are involved in planning, establishing, and managing a small business enterprise. Topics to be covered include planning, location, analysis, financing, and development of a business plan. (3 sch: 3-hr lecture)  
Prerequisite: None

Course Name: Event Management  
Course Abbreviation: MMT 2523  
Classification: Vocational–Technical Elective  
Description: Design a plan for special events, trade and consumer shows, exhibitions, and conventions. (3 sch: 2-hr lecture, 2-hr lab)  
Prerequisite: None
Executive Summary

Course Name: International Marketing
Course Abbreviation: MMT 2613
Classification: Vocational–Technical Elective
Description: Provide students with an overview and understanding of international marketing. This involves an analysis of world markets, their respective consumers and environments, and the marketing management required to meet the demands of constantly changing foreign markets. (3 sch: 3-hr lecture)
Prerequisite: None

Course Name: Internship in Business and Marketing Management Technology
Course Abbreviation: MMT 291(1–6)
Classification: Vocational–Technical Elective
Description: Direct application of concepts and theory of business and marketing management technology. Students will work in a marketing-related environment. (1–6 sch: 3- to 18-hr externship)
Prerequisite: Permission of the instructor

Fashion Marketing Technology Courses

Course Name: Fashion Design Fundamentals
Course Abbreviation: FMT 1113
Classification: Vocational–Technical Core
Description: Examines factors influencing fashion color, line, and design. Includes applications of principles of art to clothing creation and selection. (3 sch: 2-hr lecture, 2-hr lab)
Prerequisite: None

Course Name: Fashion Marketing
Course Abbreviation: FMT 1213
Classification: Vocational–Technical Core
Description: An introduction to the fashion industry including fashion terminology; nature of fashion and the creating, manufacturing, and marketing of fashion (3 sch: 2-hr lecture, 2-hr lab)
Prerequisite: None

Course Name: Product Knowledge
Course Abbreviation: FMT 1223
Classification: Vocational–Technical Elective
Description: Study of the buying and selling function with emphasis on the origin and composition of products, methods of production, quality indicators, the sale of merchandise, and the care of merchandise (3 sch: 2-hr lecture, 2-hr lab)
Prerequisite: None
Course Name: Buying  
Course Abbreviation: FMT 1233  
Classification: Vocational–Technical Core  
Description: Study of the functions of the buyer within the retail operation including logical sequences for activities and information necessary for buying merchandise (3 sch: 2-hr lecture, 2-hr lab)  
Prerequisite: None

Course Name: Textiles in Fashion  
Course Abbreviation: FMT 1313  
Classification: Vocational–Technical Core  
Description: Examination of fibers, yarns, fabric construction, finishes, and design as applied to the selection of clothing and household fabrics (3 sch: 2-hr lecture, 2-hr lab)  
Prerequisite: None

Course Name: Visual Merchandising  
Course Abbreviation: FMT 2414  
Classification: Vocational–Technical Core  
Description: Application of fundamental principles of design, perspective, and color theory to advanced projects in merchandise presentation (4 sch: 2-hr lecture, 4-hr lab)  
Prerequisite: None

Course Name: Image and Wardrobe Consulting  
Course Abbreviation: FMT 2513  
Classification: Vocational–Technical Core  
Description: Assessing and developing an appropriate client image for individuals in a variety of occupations and careers. Emphasis on solving figure problems, makeup techniques, wardrobe coordination, and the use of modeling techniques to improve image. (3 sch: 1-hr lecture, 4-hr lab)  
Prerequisite: None

Course Name: Fashion Sales Direction  
Course Abbreviation: FMT 2613  
Classification: Vocational–Technical Elective  
Description: Principles and application of retail sales promotion with emphasis on in-store activities, advertising, publicity, fashion shows, and other special events (3 sch: 1-hr lecture, 4-hr lab)  
Prerequisite: None
Course Name: Internship in Fashion Marketing Technology  
Course Abbreviation: FMT 2913, FMT 2923, or FMT 2936  
Classification: Vocational–Technical Elective  
Description: Direct application of concepts, terminology, and theory of fashion marketing. Students must be employed in a work environment in which they must solve problems as encountered in industry. (Credit is awarded at the rate of 1 sch per 3-hr externship.) (3–6 sch: 9- to 18-hr externship)  
Prerequisite: None

Course Name: Work-Based Learning I, II, III, IV, V, and VI  
Classification: Free Elective  
Description: A structured worksite learning experience in which the student, program area teacher, Work-Based Learning Coordinator, and worksite supervisor or mentor develop and implement an educational training agreement. Designed to integrate the student’s academic and technical skills into a work environment. May include regular meetings and seminars with school personnel and employers for supplemental instruction and progress reviews. (1–3 sch: 3- to 9-hr externship)  
Prerequisite: Concurrent enrollment in vocational–technical program area courses
### FOOD PRODUCTION AND MANAGEMENT TECHNOLOGY

</table>
techniques, use of equipment, and quality controls in preparing and serving meals (6 sch: 2-hr lecture, 8-hr lab)

**Prerequisite:** Culinary Arts I (FPV 1315), Food Service Sanitation (FPV 1213), or by permission of instructor

Course Name: Front of the House  
Course Abbreviation: FPV 1413  
Classification: Vocational–Technical Core  
Description: Management of the front of the house in order to fulfill the needs of the guest and the establishment. Emphasis is placed on the types and styles of dining service merchandising, customer service, and employee training techniques. (3 sch: 2-hr lecture, 2-hr lab)

**Prerequisite:** None

Course Name: Purchasing and Storage  
Course Abbreviation: FPV 2223  
Classification: Vocational–Technical Core  
Description: An introduction to selection and procurement of food and non-food materials in hospitality and related industries (3 sch: 2-hr lecture, 2-hr lab)

**Prerequisite:** Food Service Sanitation (FPV 1213), Fundamentals of Operational Procedures in Food Service (FPV 1113), or by permission of instructor  
**Corequisite:** Management Procedures and Recordkeeping (FPV 1123)

Course Name: Bakery Production and Management  
Course Abbreviation: FPV 2336  
Classification: Vocational–Technical Core (Associate’s Degree); Vocational–Technical Elective (Vocational Certificate)  
Description: Skills needed for baking and bakery merchandising. Emphasis is placed on preparation, advertising, marketing, garnishing, costing, and plating baked products. (6 sch: 2-hr lecture, 8-hr lab)

**Prerequisite:** Food Service Sanitation (FPV 1213), Culinary Arts I (FPV 1315), Culinary Arts II (FPV 1326), or by permission of instructor

Course Name: Catering Management  
Course Abbreviation: FPV 2515  
Classification: Vocational–Technical Core (Associate’s Degree); Vocational–Technical Elective (Vocational Certificate)  
Description: An overview of the background of catering and banquet management. Offers options in catering styles, pricing, menu design, operational controls, computerized management programs, and marketing. (5 sch: 2-hr lecture, 6-hr lab)

**Prerequisite:** Food Service Sanitation (FPV 1213), Culinary Arts I (FPV 1315), Front of the House (FPV 1413), Fundamentals of Operational Procedures in Food Service (FPV 1113), and Management Procedures and Recordkeeping (FPV 1123), or by permission of instructor
Prerequisite or corequisite: Culinary Arts II (FPV 1326)

Course Name: Menu Planning and Cost Control
Course Abbreviation: FPV 2613
Classification: Vocational–Technical Core
Description: A study of the principles of menu management and cost control with emphasis on foodservice operation and marketing design, nutritional adequacy, trends, cost analysis, and profit as they relate to menu design (3 sch: 2-hr lecture, 2-hr lab)
Corequisite: Management Procedures and Recordkeeping (FPV 1123) or by permission of the instructor

Course Name: Nutrition
Course Abbreviation: FPV 2713
Classification: Vocational–Technical Core
Description: A study of nutrients as related to personal health, foods and food preparation, recipe or menu modification for special customer needs, and merchandising techniques associated with nutritious meals (3 sch: 1-hr lecture, 4-hr lab)
Prerequisite: None

Course Name: Food Service Management
Course Abbreviation: FPV 2813
Classification: Vocational–Technical Core (Associate’s Degree); Vocational–Technical Elective (Vocational Certificate)
Description: Management duties such as recruiting, interviewing, hiring, scheduling, job evaluations, employee orientation and training, payrolls, and rating employee performance. This course explores the process by which the manager can enable his or her employees to function efficiently and effectively. These processes include incentive and benefit programs, discipline, and termination. (3 sch: 2-hr lecture, 2-hr lab)
Prerequisites: Fundamentals of Operational Procedures in Food Service (FPV 1113), Management Procedures and Recordkeeping (FPV 1123), Food Service Sanitation (FPV 1213), Culinary Arts I (FPV 1315), Culinary Arts II (FPV 1326), Front of the House (FPV 1413), Purchasing and Storage (FPV 2223), Catering Management (FPV 2515), Menu Planning and Cost Control (FPV 2613), and Nutrition (FPV 2713)
Corequisite: Bakery Production and Management (FPV 2336) or by permission of the instructor

Course Name: Supervised Work Experience in Food Production and Management Technology I
Course Abbreviation: FPV 291(1–3)
Classification: Vocational–Technical Elective
Description: A course that is a cooperative program between industry and education and is designed to integrate the student’s technical studies with industrial experience. Variable credit is awarded on the basis of 1 semester hour per 45 industrial contact hours. (1–3 sch: 3- to 9-hr externship)
Executive Summary

**Prerequisite:** Consent of instructor

---

**Course Name:** Supervised Work Experience in Food Production and Management Technology II

**Course Abbreviation:** FPV 292(1–3)

**Classification** Vocational–Technical Elective

**Description:** This course is a continuation of Supervised Work Experience in Food Production and Management Technology I. It is a cooperative program between industry and education and is designed to integrate the student’s technical studies with industrial experience. Variable credit is awarded on the basis of 1 semester hour per 45 industrial contact hours. (1–3 sch: 3- to 9-hr externship)

**Prerequisite:** Supervised Work Experience in Food Production and Management Technology I [FPV 291(1–3)] or by consent of instructor
Executive Summary

IRRIGATION MANAGEMENT TECHNOLOGY

Course Name: Introduction to Irrigation
Course Abbreviation: IRM 1112
Classification: Vocational–Technical Core
Description: An introduction to irrigation practices and technologies. Includes instruction in the history of irrigation, regions of water management, and the basic components of agricultural, large turf, golf, commercial, and residential irrigation systems. (2 sch: 2-hr lecture)
Prerequisites: None

Course Name: Residential Irrigation Design
Course Abbreviation: IRM 1123
Classification: Vocational–Technical Elective
Description: A course designed to teach students the proper techniques for designing irrigation systems to achieve an effective and efficient irrigation system (3 sch: 2-hr lecture, 2-hr lab)
Prerequisites: IRM 1143 Residential Irrigation Installation or HLT 2824 Irrigation and Lighting Systems and Installation, and college math

Course Name: Irrigation Systems Installation I
Course Abbreviation: IRM 1144
Classification: Vocational–Technical Elective
Description: An introductory course on the installation of irrigation systems. Includes instruction in basic components, site inspections, blueprint interpretation, methods and procedures for installation, and lighting system installation. (4 sch: 2-hr lecture, 4-hr lab) (HLT 2824 may be taken in lieu of this course.)
Prerequisites: None

Course Name: Irrigation Troubleshooting and Repair
Course Abbreviation: IRM 1223
Classification: Vocational–Technical Elective
Description: A course designed to introduce students to basic fundamental and step processes to troubleshoot existing irrigation systems (3 sch: 1-hr lecture, 4-hr lab)
Prerequisites: None

Course Name: Irrigation Systems Installation II
Course Abbreviation: IRM 1243
Classification: Vocational–Technical Elective
Description: A continuation of IRM 1144 with emphasis on irrigation auditing and contracting procedures such as system installation, site inspection, uniform efficiency measures, and calculation of base watering schedules for a specific site (3 sch: 2-hr lecture, 2-hr lab)
Executive Summary

**Prerequisites:** IRM 1144 Irrigation Systems Installation I or HLT 2824 Irrigation and Lighting Systems

**Course Name:** Green Industry Cost Estimating  
**Course Abbreviation:** IRM 2123  
**Classification:** Vocational–Technical Core  
**Description:** A course designed to introduce budgeting and estimating fundamentals used in the landscape and irrigation industries (3 sch: 2-hr lecture, 2-hr lab) (Also taught as HLT 2123, Green Industry Cost Estimating)  
**Prerequisites:** None

**Course Name:** Irrigation Pumps, Controls, and Relays  
**Course Abbreviation:** IRM 2233  
**Classification:** Vocational–Technical Core  
**Description:** A study of the basic function, operation, and maintenance of water pumps for irrigation systems. Includes instruction in determining pump size and providing backflow protection. (3 sch: 2-hr lecture, 2-hr lab)  
**Prerequisites:** None

**Course Name:** Irrigation Auditing  
**Course Abbreviation:** IRM 2312  
**Classification:** Vocational–Technical Elective  
**Description:** A course to prepare students to take the Irrigation Association’s Certified Landscape Auditor examination. Includes instruction on site inspection, system inspection, and tune-up of irrigation systems, data collection, base water scheduling, and irrigation management practices. Students will perform an audit following approved practices. (2 sch: 1-hr lecture, 2-hr lab)  
**Pre/Corequisites:** IRM 1144 Irrigation Systems Installation I, IRM 1123 Residential Irrigation Design, and IRM 1223 Irrigation Troubleshooting and Repair (Two years of verified experience in the irrigation industry may substitute for these courses, per Irrigation Association requirements.)

**Course Name:** Special Problem in Irrigation Management Technology  
**Course Abbreviation:** IRM 291(1–3)  
**Classification:** Vocational–Technical Elective  
**Description:** A course to provide students with an opportunity to utilize skills and knowledge gained in other Irrigation Management Technology courses. The instructor and student work closely together to select a topic and establish criteria for completion of the project. (1–3 sch: 2-to 6-hr lab)  
**Prerequisites:** Consent of instructor
Course Name: Supervised Work Experience in Irrigation Management Technology
Course Abbreviation: IRM 292(1–6)
Classification: Vocational–Technical Core
Description: A course that is a cooperative program between industry and education designed to integrate the student’s technical studies with industrial experience. Variable credit is awarded on the basis of 1 semester hour per 45 industrial contact hours. (1–6 sch: 3- to 18-hr externship)
Prerequisite: Consent of instructor and completion of at least one semester of advanced course work in Irrigation Management Technology

Course Name: Work-Based Learning I, II, III, IV, V, and VI
Classification: Free Elective
Description: A structured worksite learning experience in which the student, program area teacher, Work-Based Learning Coordinator, and worksite supervisor/mentor develop and implement an educational training agreement. Designed to integrate the student’s academic and technical skills into a work environment. Includes regular meetings and seminars with school personnel for supplemental instruction and progress reviews. (1–3 sch: 3- to 9-hr externship)
Prerequisites: Concurrent enrollment in vocational–technical program area courses
# MASSAGE THERAPY

**Course Name:** CPR, First Aid, and OSHA Standards  
**Course Abbreviation:** MGV 1111  
**Classification:** Vocational–Technical Core  
**Description:** This course develops the knowledge and skills necessary to provide emergency care for the injured or ill until appropriate professionals take over. (1 sch: 1-hr lecture)  
**Prerequisite:** None

**Course Name:** Introduction to Massage Therapy  
**Course Abbreviation:** MGV 1214  
**Classification:** Vocational–Technical Core  
**Description:** This course teaches the student theories and principles of therapeutic massage and includes the effects, benefits, indications and contraindications, history of massage therapy, Mississippi laws and regulations pertaining to massage therapist, educational and licensing requirements, professional ethics, equipment and products, client evaluations, draping techniques, massage environment, massage therapy in a health-care system, sanitary and safety practices, therapist body mechanics, conditioning, strengthening, flexibility, and human relationship skills. (4 sch: 4-hr lecture)  
**Prerequisite:** None

**Course Name:** Massage Therapy I  
**Course Abbreviation:** MGV 1224  
**Classification:** Vocational–Technical Core  
**Description:** This course examines basic skills in massage therapy for various modalities. Each modality will move into the next progressive phase enhancing the student’s knowledge. (4 sch: 4-hr lecture)  
**Prerequisite:** None

**Course Name:** Massage Therapy I Lab  
**Course Abbreviation:** MGV 1232  
**Classification:** Vocational–Technical Core  
**Description:** This course develops basic skills in massage therapy for various modalities in a laboratory setting. Each modality will move into the next progressive phase enhancing the student’s knowledge. (2 sch: 4-hr lab)  
**Prerequisite:** None

**Course Name:** Massage Therapy II  
**Course Abbreviation:** MGV 1244  
**Classification:** Vocational–Technical Core
Executive Summary

Description: Students will develop basic skills in massage therapy. Each modality will move into the next progressive phase enhancing the student’s knowledge. (4 sch: 4-hr lecture)
Prerequisite: All first semester courses

Course Name: Massage Therapy II Lab
Course Abbreviation: MGV 1253
Classification: Vocational–Technical Core
Description: Students will develop basic skills in massage therapy in a laboratory setting. Each modality will move into the next progressive phase enhancing the student’s knowledge. (3 sch: 6-hr lab)
Prerequisite: All first semester courses

Course Name: Massage Therapy Clinical Lab II
Course Abbreviation: MGV 1263
Classification: Vocational–Technical Core
Description: This course applies the principles and theories of Introduction to Massage Therapy and Massage Therapy I and builds on the principles and theories taught in Massage Therapy II and is a continuation of Massage Therapy Clinical Lab I. (3 sch: 6-hr lab)
Prerequisite: All first semester courses

Course Name: Specialized Modalities
Course Abbreviation: MGV 1272
Classification: Vocational–Technical Core
Description: Students will be introduced to several different traditions of massage and bodywork. (2 sch: 2-h lecture)
Prerequisite: All first semester courses

Course Name: Massage Therapy Clinical Lab I
Course Abbreviation: MGV 1281
Classification: Vocational–Technical Core
Description: This course applies the principles and theories of Introduction to Massage Therapy and Massage Therapy I. (1 sch: 2-hr lab)
Prerequisite: None

Course Name: Anatomy and Physiology for Massage Therapy
Course Abbreviation: MGV 1313
Classification: Vocational–Technical Core
Description: This is an introductory course in anatomy and physiology designed to prepare students for certification in the massage therapy program. The course topics discussed include body organization, cell structure and function, integumentary system, skeletal system and joints, muscular system, and nervous system cells. (3 sch: 3-hr lecture)
Executive Summary

**Prerequisite:** None

Course Name: Kinesiology
Course Abbreviation: MGV 1332
Classification: Vocational–Technical Core
Description: This course studies the mechanical aspects of human motion. (2 sch: 2-hr lecture)
Prerequisite: All first semester courses

Course Name: Pathology and Medical Terminology
Course Abbreviation: MGV 1343
Classification: Vocational–Technical Core
Description: This course is designed to teach the student functional assessment of therapeutic massage in relation to pathology. The student learns pathology of multiple systems and determines its impact on the delivery of massage therapy services in his or her own practice. Discussion of the massage therapy scope of practice and its relationship to other allied health professions is included. Understanding methods of communication with other professionals and clients, exploring holistic self-care practices, and developing a systematic evaluation and documentation scheme are also covered. (3 sch: 3-hr lecture)
Prerequisite: None

Course Name: Anatomy and Physiology for Massage Therapy II
Course Abbreviation: MGV 1353
Classification: Vocational–Technical Core
Description: This course is part 2 of an introductory course in anatomy and physiology designed to prepare students for certification in the massage therapy program. The course topics include sensory nervous system, the brain and brain divisions, cranial nerves, autonomic nervous system, endocrine system, reproductive system, cardiovascular system, lymphatic system, respiratory system, digestive system, and urinary system. (3 sch: 3-hr lecture)
Prerequisite: All first semester courses

Course Name: Business and Marketing of Massage Therapy
Course Abbreviation: MGV 1511
Classification: Vocational–Technical Core
Description: This course introduces students to the various business models of massage therapy practice: independent contractor, private practice, and employee. Students will establish professional goals and develop individual plans. (1 sch: 1-hr lecture)
Prerequisite: All first semester courses
Course Name: Pharmacy Technician Fundamentals
Course Abbreviation: PHM 1111
Classification: Vocational–Technical Core
Description: Introduces the student to the pharmacy technician career field and provides an overview of pharmacy practice and the opportunities open to certified pharmacy technicians (1 sch: 1-hr lecture)
Prerequisite: None

Course Name: Pharmacy Law
Course Abbreviation: PHM 1123
Classification: Vocational–Technical Core
Description: Federal and state laws pertaining to the practice of pharmacy (3 sch: 3-hr lecture)
Prerequisite: None

Course Name: Computer Applications in Pharmacy
Course Abbreviation: PHM 1212
Classification: Vocational–Technical Core
Description: A comprehensive understanding of pharmacy computer systems in addition to hands-on operation (2 sch: 4-hr lab)
Prerequisite: None

Course Name: Pharmacy Math and Dosage Calculations
Course Abbreviation: PHM 1314
Classification: Vocational–Technical Core
Description: Proper use of the metric, apothecary, and avoirdupois systems. Conversion between the systems. Application of formulas, calculations of fractional dosages, and methods of calculating dosages from all drug forms. Review of calculations dealing with ratio and proportion, percentages, ratio strength, reducing and enlarging formulas, and dilution and concentration problems. (4 sch: 4-hr lecture)
Prerequisite: Intermediate Algebra (MAT 1233) or higher

Course Name: Pharmacy Anatomy and Physiology
Course Abbreviation: PHM 1413
Classification: Vocational–Technical Core
Description: Study of body structure essential to safe and effective pharmaceutical care (3 sch: 3-hr lecture)
Prerequisite: None
Executive Summary

Course Name: Pharmacology I
Course Abbreviation: PHM 1424
Classification: Vocational–Technical Core
Description: A study of human disease processes and rational pharmacotherapeutics relating to fluids and nutrients in the following body systems: nervous, endocrine, skeletal, muscular, gastrointestinal, reproductive, and immune. Indications, contraindications, mechanism of action, side effects, dosages, and methods of administration including how these principles can be utilized in pharmacy practice. (4 sch: 4-hr lecture)
Prerequisite: First semester Pharmacy Technology courses

Course Name: Pharmaceutical Compounding
Course Abbreviation: PHM 1512
Classification: Vocational–Technical Core
Description: Concepts of design, preparation, use, and evaluation of solid and semi-solid dosage forms. Specific topics include powders, tablets, capsules, coated dosage forms, suspensions, emulsions, magmas, gels, lotions, ointments, creams, pastes, suppositories, transdermal systems, sustained release products, and novel drug delivery systems. Exercises in computer application, prescription, and physician order interpretation, and the introduction of extemporaneous compounding are performed in the laboratory. (2 sch: 1-hr lecture, 2-hr lab)
Prerequisite: Pharmacy Math and Dosage Calculations (PHM 1314)

Course Name: Pharmacy Practice
Course Abbreviation: PHM 1525
Classification: Vocational–Technical Core
Description: Medication distribution systems utilized in retail and hospital pharmacy, including processing of individual prescriptions, floor stock distribution, unit dose systems, and IV admixture. Topics discussed include hazardous waste handling, infection control, principles of quality assurance, and equipment use and maintenance. Exercises in packaging, unit dose functions, aseptic compounding, parental admixture, and use of computer database systems will be performed in the laboratory. (5 sch: 3-hr lecture, 4-hr lab)
Prerequisite: First semester Pharmacy Technology courses

Course Name: Pharmacology II
Course Abbreviation: PHM 2434
Classification: Vocational–Technical Core
Description: A study of human disease processes and rational pharmacotherapeutics relating to the cardiovascular, respiratory, renal, hematologic, and dermatologic systems as well as the eyes, ears, nose, and throat. Indications, contraindications, mechanism of action, side effects, dosages, and methods of administration including how these principles can be utilized in pharmacy practice. (4 sch: 4-hr lecture)
Prerequisite: First three semesters of Pharmacy Technology courses
Course Name: Nonprescription Medications and Devices
Course Abbreviation: PHM 2534
Classification: Vocational–Technical Core
Description: Reviews the categories of the over-the-counter medications, explains the types and procedures of home monitoring equipment, and provides guidelines for patient counseling. Explains durable and surgical or non-durable medical products. Highlights concepts of vitamins, herbs, and nutritional supplements and the nontraditional treatment options. (4 sch: 4-hr lecture)
Prerequisite: First three semesters of Pharmacy Technology courses

Course Name: Drug Information Research
Course Abbreviation: PHM 2543
Classification: Vocational–Technical Core
Description: The concepts of obtaining pertinent patient information and data collection including patient medical records, patient interviews, drug use reviews, literature resources, and problem solving (3 sch: 2-hr lecture, 2-hr lab)
Prerequisite: First three semesters of Pharmacy Technology courses

Course Name: Practicum I
Course Abbreviation: PHM 2614
Classification: Vocational–Technical Core
Description: Application of pharmacist technician concepts in community and hospital pharmacy, home health, and extended care settings. The student will be placed in a community or institutional setting as the setting is available. Emphasis is placed on functions associated with medication distribution systems. (4 sch: 12-hr clinical)
Prerequisite: Second semester Pharmacy Technology courses

Course Name: Practicum II
Course Abbreviation: PHM 2624
Classification: Vocational–Technical Core
Description: Progression of internship rotations in community hospitals, medical centers, or pharmaceutical manufacturers. The student will be placed in the setting not used in Practicum I. Emphasis is placed on intravenous admixture preparations, total parenteral nutrition, chemotherapy preparations, and the use of controlled and investigational drugs in an institution. (4 sch: 12-hr clinical)
Prerequisite: First three semesters of Pharmacy Technology courses

Course Name: Practicum III
Course Abbreviation: PHM 2634
Classification: Vocational–Technical Core
**Executive Summary**

**Description:** Advanced progression of internship rotations in community hospitals, medical centers, or pharmaceutical manufacturers. Emphasis is placed on intravenous admixture preparations, total parenteral nutrition, chemotherapy preparations, and the use of controlled and investigational drugs in an institution. (4 sch: 12-hr clinical)

**Prerequisite:** First three semesters of Pharmacy Technology courses

* * * * *

**Course Name:** Pharmacy Management  
**Course Abbreviation:** PHM 2715  
**Classification:** Vocational–Technical Core  
**Description:** Discussion of pharmacy functions relating to policies and procedures, pharmaceutical purchasing, inventory control, drug recall and returns, and maintaining transaction records. The class explores several retail functions such as payments, billing, oral and written communications, computer data collection, and pharmaceutical merchandising. (5 sch: 4-hr lecture, 2-hr lab)

**Prerequisite:** First four semesters of Pharmacy Technology courses

* * * * *

**Course Name:** Pharmacy Transition  
**Course Abbreviation:** PHM 2813  
**Classification:** Vocational–Technical Core  
**Description:** Further develops decision-making skills and promotes an interest in continued professional development. Employment opportunities and responsibilities, as well as preparation for the Pharmacy Technician Certification Exam, are emphasized. (3 sch: 3-hr lecture)

**Prerequisite:** First four semesters of Pharmacy Technology courses
PIPEFITTER/STEAMFITTER

Course Name: Fundamentals of Plumbing/Pipefitter
Course Abbreviation: PPV/PCT 1113
Classification: Vocational–Technical Core (Plumbing and Pipefitting)
Description: Job safety and health, including first aid. Also, occupational hazards and the scope of the OSHA law. Includes pipefitting and plumbing fittings, valves, hangers, and general trade fitting identification. Included are screwed, welded, flanged, soldered, brazed, glued, compression, and flared fittings. Identification and use of pipefitting and plumbing tools used in today’s piping industry. (3 sch: 1-hr lecture, 4-hr lab)
Prerequisite: None

Course Name: Tacking, Brazing, and Burning
Course Abbreviation: PPV/PCT 1213
Classification: AOC Core (Plumbing Associate’s Degree and Pipefitting) and Vocational–Technical Elective (Plumbing Certificate)
Description: Striking an arc, tacking metal together, setting up an oxyacetylene torch and burning, brazing and soldering, and cutting straight and bevel angles on flat steel and pipe. Safety procedures will be covered and emphasized. (3 sch: 1-hr lecture, 4-hr lab)
Prerequisite: None

Course Name: Blueprint Reading for Piping Trades
Course Abbreviation: PPV 1313
Classification: Vocational–Technical Core (Pipefitting)
Description: An in-depth understanding of blueprint reading related to pipefitting (3 sch: 1-hr lecture, 4-hr lab)
Prerequisite: None

Course Name: Sketching
Course Abbreviation: PPV/PCT 1323
Classification: AOC Core (Plumbing Associate’s Degree and Pipefitting) and Vocational–Technical Elective (Plumbing Certificate)
Description: Sketching, measuring, and recording required information to supplement oral descriptions and organize ideas to include individual piping components (3 sch: 1-hr lecture, 4-hr lab)
Prerequisite: None

Course Name: Pressure Boilers
Course Abbreviation: PPV/PCT 1411
Classification: Vocational–Technical Core (Pipefitting and Plumbing)
Description: Introduction to safe operation of pressure boilers for heating, steam production, and water heating (1 sch: 2-hr lab)
Prerequisite: None

Course Name: Basic Fabrication for Pipefitting
Course Abbreviation: PPV 1426
Classification: AOC Core (Pipefitting)
Description: Use of pipefitting tools and equipment, different ways of cutting and fitting pipes, methods of calculating pipe fittings, and various types of fit-ups for different types of pipe (6 sch: 2-hr lecture, 8-hr lab)
Prerequisites: None

Course Name: Pipe Specifications and Systems
Course Abbreviation: PPV 1432
Classification: AOC Core (Pipefitting)
Description: Different metals used in making pipe; their sizes, weights, and strengths; and how they are manufactured. The pipe systems on ships and industrial plants are studied. (2 sch: 1-hr lecture, 2-hr lab)
Prerequisites: None

Course Name: Piping Level/Transit
Course Abbreviation: PPV/PCT 1443
Classification: AOC Core (Plumbing) and Vocational–Technical Elective (Pipefitting Certificate)
Description: Applications of the leveling instruments, shooting elevations, and grading pipes (3 sch: 1-hr lecture, 4-hr lab)
Prerequisites: None

Course Name: Advanced Pipefitting Lab
Course Abbreviation: PPV 1456
Classification: AOC Core (Pipefitting)
Description: Advanced pipefitting layout, fabrication, and testing of piping systems (6 sch: 2-hr lecture, 8-hr lab)
Prerequisites: None

Course Name: Domestic Systems
Course Abbreviation: PPV/PCT 1712
Classification: AOC Core (Plumbing) and Vocational–Technical Elective (Pipefitting)
Description: Information on the installation of a hot water system according to the unit fixture system. Also information on sizing and installation of a potable cold water system. (2 sch: 4-hr lab)
Course Name: Plumbing Fixtures Lab
Course Abbreviation: PPV/PCT 1722
Classification: AOC Core (Plumbing) and Vocational–Technical Elective (Pipefitting)
Description: Information on the installation of the rough-in and finish fixtures used in the plumbing construction according to International Plumbing Code (2 sch: 4-hr lab)
Prerequisites: None

Course Name: Rigging and Signaling
Course Abbreviation: PPV/PCT 1812
Classification: AOC Core (Plumbing Associate’s Degree and Pipefitting) and Vocational–Technical Elective (Plumbing Certificate)
Description: Basic use of hand signals, rigging, and equipment (2 sch: 1-hr lecture, 2-hr lab)
Prerequisites: None

Course Name: Steel Ship Building and Marine Construction
Course Abbreviation: PPV 1823
Classification: Vocational–Technical Elective (Pipefitting)
Description: Structure of a ship and abbreviation of parts and sections of ships. Also, various types of piping systems, including both building and marine pipefitting systems. (3 sch: 2-hr lecture, 2-hr lab)
Prerequisites: None

Course Name: Special Project in Pipefitting
Course Abbreviation: PPV 291(1–3)
Classification: Vocational–Technical Elective (Pipefitting)
Description: Practical application of skills and knowledge gained in other technical courses. The instructor works closely with the student to ensure that the selection of a project will enhance the student’s learning experience. (1–3 sch: 2- to 6-hr lab)
Prerequisites: Consent of instructor

Course Name: Supervised Work Experience in Pipefitting
Course Abbreviation: PPV 292(1–6)
Classification: Vocational–Technical Elective (Pipefitting)
Description: A cooperative program between industry and education designed to integrate the student’s studies with industrial experience. Variable credit is awarded on the basis of semester hour per 45 industrial contact hours. (1–6 sch: 3- to 18-hr externship)
Prerequisites: Consent of instructor
Course Name: Work-Based Learning I, II, III, IV, V, and VI
Classification: Free Elective
Description: A structured worksite learning experience in which the student, program area teacher, Work-Based Learning Coordinator, and worksite supervisor/mentor develop and implement an educational training agreement. Designed to integrate the student’s academic and technical skills into a work environment. May include regular meetings and seminars with school personnel and employers for supplemental instruction and progress reviews. (1–3 sch: 3- to 9-hr externship)
Prerequisite: Concurrent enrollment in vocational–technical program area courses
PLUMBING TECHNOLOGY

*    *    *    *    *    *

Course Name: Fundamentals of Plumbing/Pipefitting
Course Abbreviation: PPV/PCT 1113
Classification: Vocational–Technical Core (Plumbing and Pipefitting)
Description: Job safety and health, including first aid. Also, occupational hazards and the scope of the OSHA law. Includes pipefitting and plumbing fittings, valves, hangers, and general trade fitting identification. Included are screwed, welded, flanged, soldered, brazed, glued, compression, and flared fittings. Identification and use of pipefitting and plumbing tools used in today’s piping industry. (3 sch: 1-hr lecture, 4-hr lab)
Prerequisite: None

*    *    *    *    *    *

Course Name: Blueprint Reading for Plumbing
Course Abbreviation: PPV/PCT 1333
Classification: Vocational–Technical Core (Plumbing)
Description: An in-depth understanding of blueprint reading related to plumbing profession (3 sch: 1-hr lecture, 4-hr lab)
Prerequisite: None

*    *    *    *    *    *

Course Name: Pressure Boilers
Course Abbreviation: PPV/PCT 1411
Classification: Vocational–Technical Core (Pipefitting and Plumbing)
Description: Introduction to safe operation of pressure boilers for heating, steam production, and water heating (1 sch: 2-hr lab)
Prerequisite: None

Pipefitting Technology Courses

Course Name: Tacking, Brazing, and Burning
Course Abbreviation: PPV/PCT 1213
Classification: AOC Core (Plumbing Associate’s Degree and Pipefitting) and Vocational–Technical Elective (Plumbing Certificate)
Description: Striking an arc; tacking metal together; setting up an oxyacetylene torch and burning, brazing, and soldering; and cutting straight and bevel angles on flat steel and pipe. Safety procedures will be covered and emphasized. (3 sch: 1-hr lecture, 4-hr lab)
Prerequisite: None

Course Name: Sketching
Course Abbreviation: PPV/PCT 1323
Classification: AOC Core (Plumbing Associate’s Degree and Pipefitting) and Vocational–Technical Elective (Plumbing Certificate)
Executive Summary

Description: Sketching, measuring, and recording required information to supplement oral descriptions and organize ideas to include individual piping components (3 sch: 1-hr lecture, 4-hr lab)
Prerequisite: None

Course Name: Rigging and Signaling
Course Abbreviation: PPV/PCT 1812
Classification: AOC Core (Plumbing Associate’s Degree and Pipefitting) and Vocational–Technical Elective (Pipefitting Certificate)
Description: Basic use of hand signals, rigging, and equipment (2 sch: 1-hr lecture, 2-hr lab)
Prerequisites: None

Plumbing Technology Courses

Course Name: Piping Level/Transit
Course Abbreviation: PPV/PCT 1443
Classification: AOC Core (Plumbing) and Vocational–Technical Elective (Pipefitting Certificate)
Description: Applications of the leveling instruments, shooting elevations, and grading pipes (3 sch: 1-hr lecture, 4-hr lab)
Prerequisites: None

Course Name: Drainage and Sewer Systems
Course Abbreviation: PPV/PCT 1513
Classification: AOC Core (Plumbing)
Description: Information and practical aspects of drainage and disposal systems and the International Plumbing Code. Included are the installation of the drainage system in a residential unit covering health aspects and the disposal of poisonous gases arising from the discharge of traps. Instruction is provided on elements of disposal systems, including sewer, septic tanks, tank size calculations, maintenance causes, and removal of sewer obstructions. (3 sch: 1-hr lecture, 4-hr lab)
Prerequisites: None

Course Name: Heating Devices
Course Abbreviation: PPV/PCT 1612
Classification: AOC Core (Plumbing)
Description: Information on local codes for installing and repairing water heaters, force air units, and floor furnaces (2 sch: 1-hr lecture, 2-hr lab)
Prerequisites: None

Course Name: Gas Piping
Course Abbreviation: PPV/PCT 1622
Executive Summary

**Classification:** AOC Core (Plumbing)
**Description:** Information on standard gas codes. The safe installation of gas appliances and gas lines, according to codes, will be included. (2 sch: 1-hr lecture, 2-hr lab)
**Prerequisites:** None

---

**Course Name:** Domestic Systems
**Course Abbreviation:** PPV/PCT 1712
**Classification:** AOC Core (Plumbing) and Vocational–Technical Elective (Pipefitting)
**Description:** Information on the installation of a hot water system according to the unit fixture system. Also information on sizing and installation of a potable cold water system. (2 sch: 4-hr lab)
**Prerequisites:** None

---

**Course Name:** Plumbing Fixtures Lab
**Course Abbreviation:** PPV/PCT 1722
**Classification:** AOC Core (Plumbing) and Vocational–Technical Elective (Pipefitting)
**Description:** Information on the installation of the rough-in and finish fixtures used in the plumbing construction according to International Plumbing Code (2 sch: 4-hr lab)
**Prerequisites:** None

---

**Course Name:** Backflow Cross Connection
**Course Abbreviation:** PPV/PCT 1732
**Classification:** AOC Core (Plumbing)
**Description:** Information on the different types of backflow devices and the installation and testing of the devices (2 sch: 1-hr lecture, 2-hr lab)
**Prerequisites:** None

---

**Course Name:** Advanced Plumbing Lab
**Course Abbreviation:** PPV/PCT 1743
**Classification:** AOC Core (Plumbing)
**Description:** Additional study in the area of advanced plumbing in the commercial area (3 sch: 1-hr lecture, 4-hr lab)
**Prerequisites:** None

---

**Course Name:** Special Project in Plumbing
**Course Abbreviation:** PPV/PCT 191(1–3)
**Classification:** Vocational–Technical Elective (Plumbing)
**Description:** Practical application of skills and knowledge gained in other technical courses. The instructor works closely with the student to ensure that the selection of a project will enhance the student’s learning experience. (1–3 sch: 2- to 6-hr lab)
**Prerequisites:** Consent of instructor

---
** Executive Summary

*    *    *    *    *

** Course Name:** Supervised Work Experience in Plumbing  
**Course Abbreviation:** PPV/PCT 192(1–6)  
**Classification:** Vocational–Technical Elective (Plumbing)  
**Description:** This course is a cooperative program between industry and education and is designed to integrate the student’s studies with industrial experience. Variable credit is awarded on the basis of 1 semester hour per 45 industrial contact hours. (1–6 sch: 3- to 18-hr externship)  
**Prerequisites:** Consent of instructor

*    *    *    *    *

** Course Name:** Work-Based Learning I, II, III, IV, V, and VI  
**Course Abbreviation:** WBL 191(1–3), WBL 192(1–3), WBL 193(1–3), WBL 291(1–3), WBL 292(1–3), and WBL 293(1–3)  
**Classification:** Free Elective  
**Description:** A structured worksite learning experience in which the student, program area teacher, Work-Based Learning Coordinator, and worksite supervisor/mentor develop and implement an educational training agreement. Designed to integrate the student’s academic and technical skills into a work environment. May include regular meetings and seminars with school personnel and employers for supplemental instruction and progress reviews. (1–3 sch: 3- to 9-hr externship)  
**Prerequisite:** Concurrent enrollment in vocational–technical program area courses
PRACTICAL NURSING

Course Name: Body Structure and Function
Course Abbreviation: PNV 1213
Classification: Vocational–Technical Core
Description: This course is a study of body structure and function essential to safe and effective nursing care. Each system of the body is covered with applications to nursing. (3 sch: 3-hr lecture)
Prerequisite: None

Course Name: Fundamentals of Nursing
Course Abbreviation: PNV 1426
Classification: Vocational–Technical Core
Description: This course provides the student with the basic knowledge and skills necessary to care for the individual in wellness and illness and is applicable across the life span. (6 sch: 6-hr lecture)
Pre/corequisite: This course requires concurrent registration in PNV 1436. It also requires passing grades in PNV 1426 and PNV 1436 to receive credit for these courses. If passing grades are not maintained, both courses must be repeated concurrently upon readmission.

Course Name: Fundamentals of Nursing Lab/Clinical
Course Abbreviation: PNV 1436
Classification: Vocational–Technical Core
Description: This course provides demonstration of and supervised practice of the fundamental skills related to practical nursing. (6 sch: 9-hr lab, 4.5-hr clinical)
Corequisites: Concurrent registration in PNV 1426 is required. Passing grades in PNV 1426 and PNV 1436 are required in order to progress in the practical nursing program. If passing grades are not maintained, both courses must be repeated concurrently upon readmission.

Course Name: IV Therapy Concepts
Course Abbreviation: PNV 1524
Classification: Vocational–Technical Core
Description: This course is designed to prepare the practical nurse to perform the expanded role of IV therapy as outlined in the Mississippi Nursing Practice Law, Rules, and Regulations. The student, upon completion of the practical nursing program and successful passage of the licensure examination, is eligible to apply for IV certification as outlined in the above mentioned rules and regulations. (4 sch: 3-hr lecture, 2-hr lab)
Prerequisites: All first semester Practical Nursing courses
Course Name: Medical/Surgical Nursing
Course Abbreviation: PNV 1614
Classification: Vocational–Technical Core
Description: This course provides the student with the basic nursing theory and skills to provide safe and effective care for a client experiencing an alteration in health in systems selected from the following: vascular; respiratory; sensory and integumentary; musculoskeletal; gastrointestinal; blood, lymphatic, and immunosuppressive; urinary; reproductive; endocrine; and neurological. The systems not covered in this course are taught in Alterations in Adult Health (PNV 1634). Pharmacological and nutritional therapy, as well as oncological considerations, for various disorders is included. (4 sch: 4-hr lecture)
Prerequisites: All first semester courses. Concurrent registration in PNV 1622 is required. Passing grades in PNV 1614 and PNV 1622 are required in order to progress in the practical nursing program. If passing grades are not maintained, both courses must be repeated concurrently upon readmission.

Course Name: Medical/Surgical Nursing Clinical
Course Abbreviation: PNV 1622
Classification: Vocational–Technical Core
Description: This course includes supervised clinical experiences for application of medical/surgical theory, the development of skills, and the use of nursing process. (2 sch: 6-hr clinical)
Pre/corequisites: All first semester courses. Concurrent registration in PNV 1614 is required. It also requires passing grades in PNV 1614 and PNV 1622 in order to progress in the practical nursing program. If passing grades are not maintained, both courses must be repeated concurrently upon readmission.

Course Name: Alterations in Adult Health
Course Abbreviation: PNV 1634
Classification: Vocational–Technical Core
Description: This course provides the student with the basic nursing theory and skills to provide safe and effective care for a client experiencing an alteration in health in systems selected from the following: vascular; respiratory; sensory and integumentary; musculoskeletal; gastrointestinal; blood, lymphatic, and immunosuppressive; urinary; reproductive; endocrine; and neurological. The systems not covered in this course are taught in Medical/Surgical Nursing (PNV 1614). Pharmacological and nutritional therapy, as well as oncological considerations, for various disorders is included. (4 sch: 4-hr lecture)
Pre/corequisites: All first semester courses. Concurrent registration in PNV 1642 is required. Passing grades in PNV 1634 and PNV 1642 are required in order to progress in the practical nursing program. If passing grades are not maintained, both courses must be repeated concurrently upon readmission.
Course Name: Alterations in Adult Health Clinical
Course Abbreviation: PNV 1642
Classification: Vocational–Technical Core
Description: This course includes supervised clinical experiences for application of medical/surgical theory, the development of skill, and the use of nursing process. (2 sch: 6-hr clinical)
Pre/corequisites: All first semester courses. Concurrent enrollment in PNV 1634 is required. Passing grades in PNV 1634 and PNV 1642 are required in order to progress in the practical nursing program. If passing grades are not maintained, both courses must be repeated concurrently upon readmission.

Course Name: Maternal-Child Nursing
Course Abbreviation: PNV 1715
Classification: Vocational–Technical Core
Description: This course provides the student with basic knowledge and skills to provide safe and effective care for clients and families during pregnancy, postpartum, infancy, and childhood. (5 sch: 4.7-hr lecture, 1-hr clinical)
Prerequisites: All first semester PNV courses

Course Name: Mental Health Concepts
Course Abbreviation: PNV 1813
Classification: Vocational–Technical Core
Description: This course provides an introduction to mental health concepts. Clinical experience will provide application of learned theory. (3 sch: 2.7-hr lecture, 1-hr clinical)
Prerequisites: First semester PNV courses

Course Name: Nursing Transition
Course Abbreviation: PNV 1914
Classification: Vocational–Technical Core
Description: Nursing Transition promotes the development of clinical decision-making skills and an interest in continued professional development. Legal aspects of nursing and employment opportunities and responsibilities as well as preparation for the National Council Licensure Examination (NCLEX-PN®) are included. (4 sch: 2-hr lecture, 2-hr lab, 3-hr clinical)
Prerequisites: All first and second semester PNV courses
**PROCESS OPERATIONS TECHNOLOGY**

**Course Name:** Pulping and Bleaching  
**Course Abbreviation:** PPT 1124  
**Classification:** Vocational–Technical Elective  
**Description:** This course provides an introduction to major pulping and bleaching processes and chemistry used. This is a lecture–laboratory class covering the basic types of laboratory techniques used in the pulp and paper industry. The main emphasis is the practical aspects of techniques, procedures, and use of equipment, calibration of equipment, and the interpretation of data. (4 sch: 3-hr lecture, 2-hr lab)  
**Prerequisite:** Process Chemistry (PPT 1214), Introduction to Process Technology (PPT 1133), or conditional approval from administration

**Course Name:** Introduction to Process Technology  
**Course Abbreviation:** PPT 1133  
**Classification:** Vocational–Technical Required Course  
**Description:** An introduction to process operations within the process industry. Topics include technician duties, responsibilities, and expectations; plant organizations; the plant process and utility system; and the physical and mental requirements of the process technician. (3 sch: 3-hr lecture)  
**Prerequisite:** None

**Course Name:** Process Chemistry  
**Course Abbreviation:** PPT 1214  
**Classification:** Vocational–Technical Elective  
**Description:** An introduction to general and organic chemistry as applied to the process industry. Includes instruction on matter, energy, atoms, chemical reactions, and chemical bonding. (4 sch: 3-hr lecture, 2-hr lab)  
**Prerequisite:** None

**Course Name:** Process Technology I (Equipment)  
**Course Abbreviation:** PPT 1424  
**Classification:** Vocational–Technical Core  
**Description:** Instruction in the use of common process equipment including piping, valves, pumps, compressors, drivers, and fixed equipment such as exchangers, tanks, drums, and vessels (4 sch: 3-hr lecture, 2-hr lab)  
**Prerequisite:** None
Course Name: Process Technology II (Systems)
Course Abbreviation: PPT 1434
Classification: Vocational–Technical Core
Description: Study of the interrelation of process equipment and process systems including related scientific principles (4 sch: 3-hr lecture, 2-hr lab)
Pre/Corequisite: Process Technology I (Equipment) (PPT 1424)

Course Name: Process Technology III (Operations)
Course Abbreviation: PPT 1444
Classification: Vocational–Technical Core
Description: A course that combines equipment systems into operational units with an emphasis on instruction for start-up, normal operation, abnormal/emergency operations, and shutdown of an entire process (4 sch: 3-hr lecture, 2-hr lab)
Prerequisite: None

Course Name: Safety, Health, and Environment
Course Abbreviation: PPT 1513
Classification: Vocational–Technical Core
Description: Development of knowledge and skills to reinforce attitudes and behaviors required for safe and environmentally sound work habits. Emphasis is placed on safety, health, and environmental issues in the performance of all job tasks and regulatory compliance issues. (3 sch: 3-hr lecture)
Prerequisite: None

Course Name: Technical Communication
Course Abbreviation: PPT 1613
Classification: Vocational–Technical Elective
Description: An application of written, oral, and other forms of communication to the process technology industry. Includes instruction and practice in written communications (reports and presentations, procedures, resumes, documentation, training materials, etc.) and oral communications (presentations, directions/instructions, feedback, etc.). (3 sch: 3-hr lecture)
Prerequisite: None

Course Name: Process Instrumentation I
Course Abbreviation: PPT 1714
Classification: Vocational–Technical Core
Description: A study of the instruments and instrument systems used in chemical processing industry including terminology, primary variables, symbols, and control loops (4 sch: 3-hr lecture, 2-hr lab)
Prerequisite: None
Course Name: Oil and Gas Production I  
Course Abbreviation: PPT 2113  
Classification: Vocational–Technical Elective  
Description: An overview of the petroleum industry including exploration and geology, well drilling, wellhead operations, and product distribution. Emphasis is placed on oil and gas production. (3 sch: 3-hr lecture)  
Prerequisite: None

Course Name: Oil and Gas Production II  
Course Abbreviation: PPT 2123  
Classification: Vocational–Technical Elective  
Description: A continuation of Oil and Gas Production I with emphasis on oil and natural gas production and processing (3 sch: 3-hr lecture)  
Prerequisite: Oil and Gas Production I (PPT 2113)

Course Name: Machine Operations for Pulp and Paper Operations  
Course Abbreviation: PPT 2154  
Classification: Vocational–Technical Elective  
Description: This course concentrates on the functions and capability of all critical equipment in the paper mill including stock preparation, approach flow, fourdrinier, press section, drier section, calendering, winding, and finishing operations. Primary process flows, consistency control, stock blending, stock refining, wet end chemistry, stock cleaning, approach flow systems, and the cause and effect relationships each of these has with the various papermaking parameters are discussed. Components of the machine fourdrinier and the concepts of formation, retention, drainage, and pressing are also explored. (4 sch: 3-hr lecture, 2-hr lab)  
Prerequisite: Process Chemistry (PPT 1214) and Introduction to Process Technology (PPT 1133)

Course Name: Power Plant and Chemical Recovery for Pulp and Paper Operations  
Course Abbreviation: PPT 2234  
Classification: Vocational–Technical Elective  
Description: The purpose of this course is to present fundamental principles of boiler operation for both power boilers and chemical recovery boilers. Emphasis is on the basic requirements for steam production and chemical recovery. Topics explored include the basic design of water tube and fire tube boilers, the concept of heat transfer, the concepts of natural and forced circulation, air and fuel supply systems, condensate and feedwater systems, the concept of chemical recovery, evaporation and deposition, and plugging problems. (4 sch: 3-hr lecture, 2-hr lab)  
Prerequisite: None
Course Name: Quality Concepts
Course Abbreviation: PPT 2313
Classification: Vocational–Technical Core
Description: A course to provide an introduction to the field of quality in the process industry. Students are introduced to industry-related process concepts including operating consistency, continuous improvement, plant economics, team skills, and statistical process control (SPC). (3 sch: 3-hr lecture)
Prerequisite: None

Course Name: Process Troubleshooting
Course Abbreviation: PPT 2323
Classification: Vocational–Technical Core
Description: A course to apply knowledge of process variables, indicators and controllers, troubleshooting tools, and troubleshooting steps to solve problems in a simple process system (3 sch: 3-hr lecture)
Prerequisite: Introduction to Process Technology (PPT 1133) and Process Instrumentation I (PPT 1714)

Course Name: Process Instrumentation II
Course Abbreviation: PPT 2724
Classification: Vocational–Technical Core
Description: A continuation of the study of varied instruments and instrument systems used in the processing industry, including terminology, primary variables, symbols, control loops, and troubleshooting (4 sch: 3-hr lecture, 2-hr lab)
Prerequisite: Process Instrumentation I (PPT 1714)

Course Name: Special Project in Process Operations Technology
Course Abbreviation: PPT 291(1–3)
Classification: Vocational–Technical Elective
Description: A course designed to provide the student with practical application of skills and knowledge gained in other vocational–technical courses. The instructor works closely with the student to ensure that the selection of a project will enhance the student’s learning experience. (1–3 sch: 2- to 6-hr lab)
Prerequisite: Consent of the instructor

Course Name: Supervised Work Experience in Process Operations Technology
Course Abbreviation: PPT 292(1–6)
Classification: Vocational–Technical Elective
Executive Summary

**Description:** A course that is a cooperative program between industry and education designed to integrate the student’s technical studies with industrial experience. Variable credit is awarded on the basis of 1 semester hour per 45 industrial contact hours. (1–6 sch: 3- to 18-hr externship)

**Prerequisite:** Consent of the instructor

---

**Course Name:** Work-Based Learning I, II, III, IV, V, and VI

**Course Abbreviation:** WBL 191(1–3), WBL 192(1–3), WBL 193(1–3), WBL 291(1–3), WBL 292(1–3), and WBL 293(1–3)

**Classification:** Free Elective

**Description:** A structured worksite learning experience in which the student, program area teacher, Work-Based Learning Coordinator, and worksite supervisor/mentor develop and implement an educational training agreement. Designed to integrate the student’s academic and technical skills into a work environment. May include regular meetings and seminars with school personnel and employers for supplemental instruction and progress reviews. (1–3 sch: 3- to 9-hr externship)

**Prerequisite:** Concurrent enrollment in vocational–technical program area courses
### SHEET METAL TECHNOLOGY

</table>
Executive Summary

Course Name: Hand Processes II
Course Abbreviation: SMT 1424
Classification: Vocational–Technical Core
Description: A continuation of Hand Processes I that includes the selection and correct and safe use of the specialty hand and power tools of the sheet metal trade (4 sch: 2-hr lecture, 4-hr lab)
Prerequisite: Hand Processes I (SMT 1414)

Course Name: Sheet Metal Welding
Course Abbreviation: SMT 1613
Classification: Vocational–Technical Core
Description: Selection and use of welding machines such as manual metal arc, gas metal arc welding (GMAW), oxyacetylene, shielded metal arc welding (SMAW), and plasma arc cutting (PAC) as used in the sheet metal trade (3 sch: 1-hr lecture, 4-hr lab)
Prerequisite: None

Course Name: Plans and Specifications I
Course Abbreviation: SMT 2213
Classification: Vocational–Technical Core (Associate’s Degree)
Description: Terms and definitions used in reading blueprints and specifications. Basic sketching, drawing, and dimensioning of objects will be covered. Also, specifications of blueprints and building codes will be covered. (3 sch: 2-hr lecture, 2-hr lab)
Prerequisite: None

Course Name: Plans and Specifications II
Course Abbreviation: SMT 2223
Classification: Vocational–Technical Core (Associate’s Degree)
Description: Continuation of Plans and Specifications I with emphasis placed on reading and interpreting blueprints and performing calculations (3 sch: 2-hr lecture, 2-hr lab)
Prerequisite: Plans and Specifications I (SMT 2213)

Course Name: Methods of Layout III
Course Abbreviation: SMT 2324
Classification: Vocational–Technical Core (Associate’s Degree)
Description: A continuation of Methods of Layout II with the use of CNC cutting methods for various layout of sheet metal projects (4 sch: 1-hr lecture, 6-hr lab)
Prerequisite: Methods of Layout II (SMT 1326)
Course Name: Machine Processes I
Course Abbreviation: SMT 2514
Classification: Vocational–Technical Core
Description: Selection and the safe use of hand- and foot-operated machines of the sheet metal trade (4 sch: 2-hr lecture, 4-hr lab)
Prerequisite: None

Course Name: Machine Processes II
Course Abbreviation: SMT 2524
Classification: Vocational–Technical Core (Associate’s Degree)
Description: A continuation of Machine Processes I that includes the use of power-operated machines of the sheet metal trade (4 sch: 2-hr lecture, 4-hr lab)
Prerequisite: Machine Processes I (SMT 2514)

Course Name: Advanced Sheet Metal Welding
Course Abbreviation: SMT 2614
Classification: Vocational–Technical Core (Associate’s Degree)
Description: Advanced sheet metal welding using various welding machines, processes, and techniques (4 sch: 2-hr lecture, 4-hr lab)
Prerequisite: Sheet Metal Welding (SMT 1613)

Course Name: Special Project in Sheet Metal
Course Abbreviation: SMT 291(1–3)
Classification: Vocational–Technical Elective
Description: Provides the student with practical application of skills and knowledge gained in other technical courses. The instructor works closely with the student to ensure that the selection of a project will enhance the student’s learning experience. (1–3 sch: 2- to 6-hr lab)
Prerequisite: Consent of instructor

Course Name: Supervised Work Experience in Sheet Metal
Course Abbreviation: SMT 292(1–3)
Classification: Vocational–Technical Elective
Description: A course that is a cooperative program between industry and education and is designed to integrate the student’s technical studies with industrial experience. Variable credit is awarded on the basis of 1 semester hour per 45 industrial contact hours. (1–3 sch: 3- to 9-hr externship)
Prerequisite: Consent of instructor
Executive Summary

Course Name: Work-Based Learning I, II, III, IV, V, and VI
Classification: Free Elective
Description: A structured worksite learning experience in which the student, program area teacher, Work-Based Learning Coordinator, and worksite supervisor/mentor develop and implement an educational training agreement. Designed to integrate the student’s academic and technical skills into a work environment. May include regular meetings and seminars with school personnel and employers for supplemental instruction and progress reviews. (1–3 sch: 3- to 9-hr externship)
Prerequisite: Concurrent enrollment in vocational–technical program area courses
Appendix A: Related Academic Standards

Reading
R1 Interpret Graphic Information (forms, maps, reference sources)
R2 Words in Context (same and opposite meaning)
R3 Recall Information (details, sequence)
R4 Construct Meaning (main idea, summary and paraphrase, compare and contrast, cause and effect)
R5 Evaluate and Extend Meaning (fact and opinion, predict outcomes, point of view)

Mathematics Computation
M1 Addition of Whole Numbers (no regrouping, regrouping)
M2 Subtraction of Whole Numbers (no regrouping, regrouping)
M3 Multiplication of Whole Numbers (no regrouping, regrouping)
M4 Division of Whole Numbers (no remainder, remainder)
M5 Decimals (addition, subtraction, multiplication, division)
M6 Fractions (addition, subtraction, multiplication, division)
M7 Integers (addition, subtraction, multiplication, division)
M8 Percents
M9 Algebraic Operations

Applied Mathematics
A1 Numeration (ordering, place value, scientific notation)
A2 Number Theory (ratio, proportion)
A3 Data Interpretation (graph, table, chart, diagram)
A4 Pre-Algebra and Algebra (equations, inequality)
A5 Measurement (money, time, temperature, length, area, volume)
A6 Geometry (angles, Pythagorean theory)
A7 Computation in Context (whole numbers, decimals, fractions, algebraic operations)
A8 Estimation (rounding, estimation)

Language
L1 Usage (pronoun, tense, subject–verb agreement, adjective, adverb)
L2 Sentence Formation (fragments, run-on, clarity)
L3 Paragraph Development (topic sentence, supporting sentence, sequence)
L4 Capitalization (proper noun, titles)
L5 Punctuation (comma, semicolon)
L6 Writing Conventions (quotation marks, apostrophe, parts of a letter)

Spelling
S1 Vowel (short, long)
S2 Consonant (variant spelling, silent letter)
S3 Structural Unit (root, suffix)

Appendix B: 21st Century Skills

CS1 Global Awareness
- Using 21st century skills to understand and address global issues
- Learning from and working collaboratively with individuals representing diverse cultures, religions, and lifestyles in a spirit of mutual respect and open dialogue in personal, work, and community contexts
- Promoting the study of non-English language as a tool for understanding other nations and cultures

CS2 Financial, Economic, and Business Literacy
- Knowing how to make appropriate personal economic choices
- Understanding the role of the economy and the role of business in the economy
- Applying appropriate 21st century skills to function as a productive contributor within an organizational setting
- Integrating oneself within and adapting continually to the nation’s evolving economic and business environment

CS3 Civic Literacy
- Being an informed citizen to participate effectively in government
- Exercising the rights and obligations of citizenship at local, state, national, and global levels
- Understanding the local and global implications of civic decisions
- Applying 21st century skills to make intelligent choices as a citizen

CS4 Information and Communication Skills
- Information and media literacy skills: Analyzing, accessing, managing, integrating, evaluating, and creating information in a variety of forms and media; understanding the role of media in society
- Communication skills: Understanding, managing, and creating effective oral, written, and multimedia communication in a variety of forms and contexts

CS5 Thinking and Problem-Solving Skills
- Critical thinking and systems thinking: Exercising sound reasoning in understanding and making complex choices; understanding the interconnections among systems
- Problem identification, formulation, and solution: Ability to frame, analyze, and solve problems
- Creativity and intellectual curiosity: Developing, implementing, and communicating new ideas to others, staying open and responsive to new and diverse perspectives

CS6 Interpersonal and Self-Directional Skills
- Interpersonal and collaborative skills: Demonstrating teamwork and leadership, adapting to varied roles and responsibilities, working productively with others, exercising empathy, and respecting diverse perspectives
- Self-direction: Monitoring one’s own understanding and learning needs, locating appropriate resources, and transferring learning from one domain to another
- Accountability and adaptability: Exercising personal responsibility and flexibility in personal, workplace, and community contexts; setting and meeting high standards and goals for oneself and others; tolerating ambiguity

---

Executive Summary

- Social responsibility: Acting responsibly with the interests of the larger community in mind; demonstrating ethical behavior in personal, workplace, and community contexts
