

Title 35, Part VII, Subpart 6

Chapter 19 Titling Requirements for Low Speed Vehicles

- 100 A low speed vehicle (“LSV”) is a device which may be used to carry people or property on public roads and for which a road and bridge privilege license is required to be obtained. The owner of an LSV may make application for a certificate of title and for a privilege license if the vehicle is used on a public road.
- 101 An LSV must meet the requirements of Part 49, Section 571.500 of the Code of Federal Regulations. It may be gasoline or electric-powered.
- 102 The Department will issue a title for an LSV only if the manufacturer’s certificate of origin clearly identifies the vehicle as an LSV. In addition, the VIN assigned to the LSV upon original manufacture must be an LSV-specific VIN.
- 103 Any vehicle originally manufactured as a recreational off-highway vehicle, including golf carts, will not be titled by the Department, regardless of whether it receives aftermarket modifications. A recreational off-highway vehicle is any motorized vehicle manufactured and designed exclusively for off-road use that is sixty-five (65) inches or less in width; has an unladen dry weight of two thousand (2,000) pounds or less; and travels on four (4) or more nonhighway tires.
